Overview & Current Events

Intuit is a cloud-based accounting and tax preparation software giant, headquartered in Mountain View, California. Its products provide financial management, compliance, and services for consumers, small businesses, self-employed workers, and accounting professionals worldwide. Its most popular platforms include QuickBooks, TurboTax, Mint, and TSheets. Cumulatively they serve more than 100 million customers. The \$110 billion company recorded \$18.8 billion in revenues last year and is headquartered in Mountain View, California.

On February 26th, 2026, Intuit posted its fiscal Q2 results for the period ending January 31st, 2026. This was another strong quarter, with Global Business Solutions revenues up 18% year-over-year to \$3.2 billion. Specifically, QuickBooks Online Accounting revenues grew 24% year-over-year, driven by higher effective prices, customer growth, and mix-shift. Online Ecosystem revenue increased 21% to \$2.5 billion, while Online Services revenues grew 18%, driven by growth in money and payroll offerings. Total international online revenue grew 9% on a constant-currency basis. Thus, total revenues for the quarter reached \$4.651 billion, up 17% year-over-year. Adjusted EPS grew by 25% to \$4.15.

Management reiterated its outlook for FY2026. Revenues are expected to be in a range of \$20.997 billion to \$21.186 billion, implying a growth rate of about 12% to 13% from last year. Adjusted EPS is expected to be between \$22.98 and \$23.18, implying a year-over-year growth of about 14% to 15%. We have applied the midpoint of this range in our estimates.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$3.74	\$3.83	\$5.19	\$5.99	\$6.92	\$9.74	\$11.85	\$14.40	\$16.94	\$20.15	\$23.08	\$42.52
DPS	\$1.20	\$1.36	\$1.56	\$1.88	\$2.12	\$2.36	\$2.72	\$3.12	\$3.60	\$4.16	\$4.80	\$8.84
Shares²	262	257	256	260	261	270	280	281	280	280	280	260

EPS CAGR over the past decade has been about 21%, while DPS CAGR has been about 15% during the period. Consistent earnings growth has resulted from multiple acquisitions that have allowed the company to expand its portfolio of products. We forecast EPS and DPS growth of around 13% through 2031 to reflect Intuit's strong momentum while assuming some degree of deceleration ahead. Overall, Intuit's resilient revenues should continue to grow gradually due to its non-stop acquisitions, which can help earnings growth amid unlocking efficiencies over time.

Our estimates might be quite prudent, and actual results are likely to be stronger. This has been the case in every single report since initiating coverage on INTU. Still, we remain conservative against a potential deceleration and unforeseen headwinds. In both FY2023 and FY2024, Intuit repurchased \$2.0 billion in stock each year. In FY2025, Intuit repurchased \$2.8 billion worth of stock. Following the company's Q4 and FY2025 results, the board approved a further \$3.2 billion repurchase authorization, raising the total authorization to \$5.3 billion. However, note that stock-based compensation

¹ Estimated dated based on past dividend dates.

² Share count is in millions.

has more than offset the company's buybacks historically, which explains the lack of a reduction in the share count over time.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	58.2	45.3	39.0	47.1	48.7	44.5	39.6	29.4	32.2	32.2	17.5	28.0
Avg. Yld.	1.3%	1.2%	1.1%	0.8%	0.8%	0.6%	0.6%	0.7%	0.7%	0.6%	1.2%	0.7%

Intuit's valuation has traded at rich premiums in recent years, as the company has dominated the tax-reporting software market. Despite continued strong growth, the stock now trades at a P/E multiple of 17.5 after the recent software sector sell-off driven by investor concerns about AI disruption. We believe this marks a market overreaction. Given Intuit's wide moat, recession proof business model, and explosive growth, we maintain our medium-term fair P/E multiple at 28. The dividend yield should remain relatively low, despite its rapid growth and the moderate payout ratio. We expect investors to enjoy total returns mainly from share price appreciation, powered by EPS growth and share buybacks.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	32%	36%	30%	31%	31%	24%	23%	22%	21%	21%	21%	21%

Intuit makes for a relatively trustworthy investment, as its revenues are primarily recession-proof, as proven by the robust sales growth despite the challenges resulting from COVID-19. While nothing is certain in life, it is safe to say that taxes won't be disappearing. The company has dominated its industry, closing more than 46 acquisitions over the past few years. With non-meaningful levels of worrying competition, its suite of products will be there to help people pay their inevitable taxes, while the company enjoys a recurring stream of revenues.

To highlight its sales resilience, even in the midst of the 2007 to 2009 financial crisis, the company managed to grow earnings by around 7%. We consider Intuit to be an incredible sector-leader, while its future acquisitions should further strengthen its portfolio of products, hence its rich valuation. The stock's dividend remains very safe, reflecting only around 21% of the company's adjusted net income.

Final Thoughts & Recommendation

Intuit continues to demonstrate strong momentum, with management's guidance implying another exciting year ahead. We see annualized returns of around 24.9% through 2031, powered mainly by our growth estimates and the possibility of a significant valuation tailwind. With a low yield, the stock may not appeal to income investors. That said, given the strong dividend hikes, Intuit stock could end up being a moderate source of income in later years. We rate shares as a buy due to total return prospects and its dividend score.
