Overview & Current Events

The New York Times Company is a global media organization that generates revenue primarily from digital and print subscriptions, advertising, and other related services. As of year-end 2025, The New York Times Company had 12.78 million subscribers worldwide, including its flagship news product, The Athletic, Cooking, Games, Wirecutter, and its audio offerings. Last year, subscriptions accounted for about 69% of its \$2.84 billion in total revenue, advertising 20%, and affiliate, licensing and other revenues roughly 11%. The company is headquartered in New York City.

On February 4th, 2026, The New York Times Company raised its dividend by 27.8% to a quarterly rate of \$0.23.

On the same day, The New York Times Company reported its Q4 results for the period ending December 31st, 2025. For the quarter, total revenues increased 10.4% year-over-year to \$802.3 million, driven by a 13.9% increase in digital-only subscription revenue, which reached \$381.5 million, with total subscribers rising to 12.78 million, including 12.21 million digital-only subscribers. Total digital-only ARPU increased 0.7% year-over-year to \$9.72. Digital advertising revenue grew 24.9% to \$147.2 million, offsetting a 5.8% decline in print advertising revenue, resulting in total advertising revenue increasing 16.1% to \$191.7 million.

GAAP EPS rose to \$0.79 for the quarter, up from \$0.75 last year, while adjusted diluted EPS increased 11.3% year-over-year to \$0.89. Operating profit increased 10.2% to \$161.6 million, and adjusted operating profit rose 12.8% to \$192.3 million, with adjusted operating margin expanding to 24.0%. For FY2025, GAAP EPS reached a record \$2.11

For Q1 2026, the Company expects double-digit growth in digital subscriptions and advertising, high-single-digit growth in affiliate and licensing revenue, and adjusted operating costs to increase 8% to 9%. For FY2026, we expect adjusted EPS of \$2.75. All past figures in our table follow GAAP reporting.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$0.18	\$0.03	\$0.76	\$0.84	\$0.60	\$1.31	\$1.04	\$1.41	\$1.79	\$2.11	\$2.75	\$4.23
DPS	\$0.16	\$0.16	\$0.16	\$0.20	\$0.24	\$0.28	\$0.36	\$0.44	\$0.52	\$0.72	\$0.92	\$1.48
Shares¹	162.8	164.3	166.9	167.5	168.0	168.5	167.1	165.7	165.8	165.0	165.0	165.0

The New York Times Company has seen its GAAP EPS undergo significant fluctuations over the past decade. In 2016, EPS fell to \$0.18 as the company faced declining print advertising revenues and increased investments in digital products to fuel future growth. A sharp decline followed in 2017, with EPS falling to \$0.03. This steep drop was due to one-time expenses, like higher severance costs from staff restructuring and investments in tech and content creation.

The situation improved in 2018 and 2019, with EPS rising to \$0.76 and \$0.84, respectively. This recovery was driven by a surge in digital subscriptions, as the company capitalized on political and global events that increased demand for high-quality journalism. The COVID-19 pandemic in 2020 caused a decline in EPS to \$0.60, as advertising revenue dropped by \$138 million due to market disruptions, even as the company added 2.3 million net digital-only subscriptions. However, this also highlighted the resilience of its subscription-focused model, which partially offset the ad revenue loss. By 2021,

¹ Share count is in millions.

The New York Times Company (NYT)

Updated February 6th, 2026, by Nikolaos Sismanis

EPS rebounded to \$1.31, driven by record-breaking subscription growth across digital products like Cooking and Games and advertising recovery. In 2022, EPS fell to \$1.04 due to heavy investment in acquisitions and technology, including the \$550 million purchase of The Athletic. EPS bounced in 2023 as integrations progressed and bundled subscriptions strengthened, rose to \$1.79 in 2024, and grew further to \$2.09 in 2025 on double-digit digital revenue growth and expanding margins.

Moving forward, we believe that NYT can grow its EPS by 9%, driven by expanding its digital subscription base, further monetization of acquisitions like The Athletic and Wordle, and ongoing growth in digital advertising revenues. We have applied a 10% growth in our dividend growth estimate. The company has raised its dividend for 8 consecutive years.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	70.2	522.3	29.4	34.8	61.1	35.6	38.5	26.6	26.9	28.4	25.0	20.0
Avg. Yld.	1.3%	1.0%	0.7%	0.7%	0.7%	0.6%	0.9%	1.2%	1.1%	1.2%	1.3%	1.8%

The New York Times has traditionally commanded premium valuation multiples. We attribute this to the broader trend of major media organizations trading and being acquired at substantial premiums. This is the case not only due to their reliable revenue streams and robust brand equity, but also by the high strategic value placed on their ability to influence engaged, high-value audiences—an asset highly prized by potential acquirers. In any case, we believe that the stock’s growth metrics modestly overvalue shares at 25x this year’s expected EPS. We have set our fair multiple at 20x EPS.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	89%	533%	21%	24%	40%	21%	35%	31%	29%	34%	33%	35%

The New York Times Company's competitive advantages include its globally recognized brand, loyal subscriber base, and diversified digital offerings like Cooking, Games, and The Athletic that boost engagement and cross-selling opportunities. The NYT is also widely regarded by readers as a high-quality journalism outlet, which positions it as a premium provider. This distinction is rather significant in a highly competitive media landscape dominated by major players like Google and Meta, who absorb the bulk of advertising dollars. Still, NYT will keep facing challenges from shifting industry dynamics, including content oversaturation. Regardless, the company should perform well during a recession given its subscription model and solid reader base.

Final Thoughts & Recommendation

The New York Times Company has one of the more interesting investment cases among its peers, with its strong brand, resilient subscription-first model, and successful digital transformation. We forecast an annualized return potential of 5.7%, as our growth estimate of 9% and the starting yield of 1.3% could be partially offset by valuation headwinds. For this reason, we assign NYT stock a hold rating.
