Overview & Current Events

Reliance Steel & Aluminum (RS) is a diversified metal solutions provider and metal services company. It was founded in 1939 and offers over 100,000 metal products (including alloy, aluminum, brass, copper, steel, titanium, etc.) across its ~315 locations. The company has a degree of recession resiliency, as it has remained profitable every year since its IPO in 1994, and is well positioned to benefit from global supply shortages. The revenues of the company are diversified across regions and commodities, with the 3 largest regions being the Midwest (35%), West/Southwest (21%), and the Southeast (20%), and the 3 largest products being carbon steel (55%), stainless steel (17%) and aluminum (15%). Some investors may consider this company to be a play on the steel markets, since ~72% of revenues come from steel. Reliance Steel & Aluminum has consistently enhanced its gross margins, from 25%-27% in the past to 29%-31%, which management considers sustainable in the long run. The stock has a market capitalization of \$17.1 billion.

In mid-February, Reliance Steel & Aluminum reported (2/18/26) results for the fourth quarter of 2025. Revenue dipped - 5% sequentially, in line with seasonal factors. The average realized price edged up 1%. Earnings-per-share decreased - 19%, from \$3.64 to \$2.96, but exceeded the analysts' consensus by \$0.14. The company provided strong guidance for the first quarter of 2026. It expects earnings-per-share of \$4.50-\$4.70, thus implying 19%-25% growth year-over-year. It also expects to improve the gross margin in the full year. Thanks to strong demand for steel and somewhat higher prices, we expect earnings-per-share of \$17.80 this year.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$4.16	\$5.47	\$8.75	\$10.34	\$7.19	\$21.97	\$30.03	\$22.62	\$15.92	\$14.26	\$17.80	\$21.66
DPS	\$1.65	\$1.80	\$2.00	\$2.20	\$2.50	\$2.75	\$3.50	\$4.00	\$4.40	\$4.80	\$5.00	\$6.24
Shares	73	73	67	67	64	62	60	58	55	52	51	48

As a commodity producer, Reliance Steel & Aluminum has exhibited a somewhat volatile performance record. Nevertheless, thanks to favorable commodity prices in the last four years, the company has grown its earnings-per-share at an average annualized rate of 14.7% over the last decade. Commodity prices have reverted to normal levels lately and hence it is prudent not to assume significant growth of prices for the upcoming years, especially given their historical wild swings. We thus expect the earnings-per-share of Reliance Steel & Aluminum to grow by 4.0% per year on average beyond this year, mostly thanks to production growth.

Reliance Steel & Aluminum has not cut its dividend for 66 consecutive years and has raised its dividend for 16 years in a row. It has grown its dividend by 12.6% per year on average over the past decade. Given the markedly low payout ratio of 28% and the rock-solid balance sheet of the company, we expect it to keep raising its dividend for many more years.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	17.1	14.1	9.9	9.3	14.5	6.9	6.3	11.4	18.7	20.4	18.4	13.0
Avg. Yld.	2.3%	2.3%	2.3%	2.3%	2.4%	1.8%	1.8%	1.6%	1.5%	1.6%	1.5%	2.2%

Reliance Steel & Aluminum (RS)

Updated February 20th, 2026, by Aristofanis Papadatos

Reliance Steel & Aluminum has traded at an average price-to-earnings ratio of 12.9 over the past decade. We assume a fair price-to-earnings ratio of 13.0 for this stock, which is currently trading at an earnings multiple of 18.4. If the stock trades at our assumed fair valuation level in five years, it will incur a -6.7% annualized drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	40%	33%	23%	21%	35%	13%	12%	18%	28%	34%	28%	29%

Reliance Steel & Aluminum faces competition from other producers, such as Steel Dynamics and Nucor, but it has maintained a meaningful moat in its business thanks to its broad product portfolio. It has averaged a payout ratio of 25% over the past decade. Thanks to a low payout ratio of 28% and an essentially debt-free balance sheet, the dividend is safe for the foreseeable future. The strong balance sheet is paramount in this cyclical business, as it helps the company endure downturns without any problem. Reliance Steel & Aluminum has a competitive advantage as the largest metals service company in North America. It has also proved fairly resilient to recessions, as it has remained profitable through every recession since its IPO in 1994.

Final Thoughts & Recommendation

Reliance Steel & Aluminum offers investors an opportunity to invest in a company that is currently benefiting from a strong steel market. Although the business is likely to benefit from a booming demand for steel from the semiconductor industry in the long run, we consider the stock unattractive due to its cyclical nature and its rich valuation. The stock could offer a -1.1% average annual total return over the next five years, as 4.0% annual growth of earnings-per-share and a 1.5% dividend may be offset by a -6.7% annualized valuation headwind. We rate the stock as a hold. While the stock may remain richly valued for a considerable period, we find it prudent to maintain a cautious long-term perspective due to the high cyclicity of this business.
