## Overview & Current Events

Sony Group Corp. is an electronics and technology company that was founded in 1946 and is headquartered in Japan. It designs and manufactures a wide range of electronics, including electronic equipment, instruments, devices, game consoles, and software, for both consumers and professionals. It has a wide variety of product segments, including video games, a movie studio, television programming, smartphones, televisions, cameras, and professional services. It also has a financial services arm which includes life and non-life insurance operations through its Japanese insurance and banking subsidiaries. The stock trades in the U.S. under the ticker symbol "Sony". The company employs approximately 113,000 people.

On October 1<sup>st</sup>, 2024, Sony completed its previously announced 5-for-1 stock split. All numbers in the table have been updated to reflect the split.

On October 1<sup>st</sup>, 2025, Sony completed its previously announced partial spin-off of Sony Financial Group Inc. (SFGYY).

On February 5<sup>th</sup>, 2026, Sony reported Q3 FY 2025 results for the period ending December 31<sup>st</sup>, 2025. All figures listed in U.S. dollars unless otherwise specified. For the quarter, revenue declined 18.1% to \$23.7 billion, but this was \$84 million more than expected. Adjusted earnings-per-share of \$0.40 were down from \$0.41 in the prior year, but beat estimates by \$0.07.

In local currency, Games & Network Services, the largest component within Sony, declined 4% due to weaker unit sales. Music was up 13%, which was driven by gains in live events, merchandising, and streaming services. Pictures decreased 12% in USD due to lower revenue from theatrical releases. Entertainment, Technology & Services were down 7% due to lower sales in Displays. Imaging & Sensing Solutions grew 21% due to higher unit sales and an improvement in product mix. The company has a total share repurchase authorization of 55 million shares.

We expect that Sony will earn \$1.25 per share in FY 2025, compared to \$1.29, \$1.20, and \$1.19 previously.

## Growth on a Per-Share Basis

| Year                      | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021   | 2022   | 2023   | 2024   | 2025          | 2030          |
|---------------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------------|---------------|
| <b>EPS</b>                | \$0.21 | \$0.10 | \$0.71 | \$1.28 | \$0.85 | \$1.77 | \$1.26 | \$1.20 | \$1.09 | \$1.26 | <b>\$1.25</b> | <b>\$1.38</b> |
| <b>DPS</b>                | \$0.02 | \$0.04 | \$0.04 | \$0.06 | \$0.07 | \$0.09 | \$0.11 | \$0.10 | \$0.11 | \$0.15 | <b>\$0.15</b> | <b>\$0.17</b> |
| <b>Shares<sup>4</sup></b> | 6,305  | 6,315  | 6,325  | 6,350  | 6,350  | 6,350  | 6,350  | 6,175  | 6,205  | 6,150  | <b>6,149</b>  | <b>6,130</b>  |

As one can see in the above table, Sony has had difficulty maintaining consistent profitability over the past 10 years. This is due to the intensely competitive forces inherent in the consumer electronics industry. Sony has to spend billions on research and development, as well as advertising to stay ahead of the competition. Earnings were up significantly over the last decade, but down almost 7% annually over the last five years. We project 2% growth given that Sony has not yet

demonstrated longer-term consistency. Sony expects to distribute \$0.15 of dividends per share last fiscal year at currency exchange rates.

## Valuation Analysis

| Year      | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | Now  | 2030 |
|-----------|------|------|------|------|------|------|------|------|------|------|------|------|
| Avg. P/E  | 25.6 | 58.9 | 11.7 | 8.0  | 13.8 | 11.4 | 16.4 | 16.2 | 15.7 | 20.2 | 17.5 | 15.0 |
| Avg. Yld. | 0.3% | 0.6% | 0.5% | 0.6% | 0.6% | 0.4% | 0.5% | 0.6% | 0.7% | 0.3% | 0.7% | 0.8% |

Shares of Sony have declined 22% since our December 8<sup>th</sup>, 2025, report. Sony's stock valuation has been highly volatile over the past decade. Furthermore, in several years Sony posted a net loss, which meant that a price-to-earnings ratio could not be computed. As such, history does not lend itself to a fair judgment of value. We reaffirm our 2030 price-to-earnings ratio target of 15, up from 13 previously, to the stock as we are not willing to award the security a premium, or even average multiple. It is true that this view could be understated if earnings were to start growing from this point. However, given the recent past, we believe Sony needs to sustain growth over the medium-term to warrant a higher valuation. Using estimates for the fiscal year, the stock trades with a P/E of 17.5. If the stock reaches our target P/E over the next five years, then valuation would reduce annual returns by 3.1% through fiscal year 2030.

Sony pays a semi-annual dividend. The first dividend payment is paid in June, and the second installment is paid in December. It should be noted that buying shares of international stocks exposes investors to currency risk as well as dividend withholding taxes.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 | 2030 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 10%  | 40%  | 6%   | 5%   | 8%   | 5%   | 9%   | 8%   | 10%  | 12%  | 12%  | 12%  |

Sony struggled to post a profit not just during the last recession, but throughout the last decade. Significant improvements have been made as of late, with much higher earnings to show for it, but the company's businesses are finicky and require substantial R&D investment to stay ahead of changing trends in the tech industry.

Sony is one of the top companies in the entertainment space and produces top of the line products. For example, Sony's image sensor is considered to be ideal for creating high quality pictures. The company's image sensor has been used by leading smart phone manufacturers, including Apple (AAPL), which has used Sony's image sensor since the iPhone 4. Sony has also worked to create an ecosystem for its products, including its PlayStation segment, which offers a monthly subscription for consumers.

## Final Thoughts & Recommendation

Sony Corporation is now expected to return -0.4% annually through fiscal year 2030, compared to our prior estimate of an annual return of -4.6%. Business results were generally lower in Q3 FY 2025, but we continue to rate shares as a hold due to projected returns and a mediocre dividend risk score.

## Total Return Breakdown by Year
