Overview & Current Events

T. Rowe Price Group, founded in 1937 and headquartered in Baltimore, MD, is one of the largest publicly traded asset managers. The company provides a broad array of mutual funds, sub-advisory services, and separate account management for individual and institutional investors, retirement plans and financial intermediaries. T. Rowe Price has a market capitalization of about \$21 billion and had assets under management (AUM) of nearly \$1.8 trillion as of December 31st, 2025.

On February 11th, 2025, T. Rowe Price raised its quarterly dividend 2.4% to \$1.27, marking the company's 39th year of increasing its payout.

On February 4th, 2026, T. Rowe Price announced fourth quarter and full year results for the period ending December 31st, 2025. For the quarter, revenue grew 6.0% to \$1.93 billion, but this was \$10 million less than expected. Adjusted earnings-per-share of \$2.44 compared favorably to \$2.12 in the prior year, but missed estimates by \$0.02. For the year, revenue grew 3.1% to \$7.3 billion while adjusted earnings-per-share of \$9.72 compared to \$9.33 in 2024.

During the quarter, AUMs totaled \$1.77 trillion, which represented growth of 8.3% year-over-year and a 3.0% improvement quarter-over-quarter. Market appreciation of \$33.9 billion was offset by net cash outflows of \$25.5 billion. Operating expenses of \$1.46 billion increased 16.5% year-over-year and 17% quarter-over-quarter.

We expect T. Rowe Price to earn \$10.07 per share in 2026.

T. Rowe Price's earnings, as well as its dividends, have grown substantially over the last decade. While earnings did drop during the last financial crisis, the overall record has been solid. Since 2016, the company has grown earnings-per-share by an average compound rate of 8.1% per year, though EPS has fallen 4.6% annually over the last five years. Moreover, the company performed well in 2020.

Asset managers like T. Rowe have low variable costs. As a result, higher revenues, driven primarily by increasing assets under management, allow for margin expansion and attractive earnings growth rates. Assets under management grow in two basic ways: increased contributions and higher underlying asset values. While asset values are finicky, the trend is upward over the long-term. On the contribution side, T. Rowe Price's strong past performance is a key selling point and could attract customers going forward. In addition, T. Rowe has another growth lever in the way of share repurchases.

With that being said there is a significant and ongoing challenge for traditional asset managers. Namely, the advance of low-cost ETFs, where other asset managers such as Blackrock or Vanguard are much better positioned. This could lead to lower growth rates for T. Rowe Price, as managers are forced to compete on price and reduce management fees.

Taking the company's strong history and solid financial position paired against a challenging industry, we are forecasting 3% growth over the next five years.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	14.7	13.1	15.6	12.4	12.8	14.5	13.6	14.2	12.1	10.5	9.4	13.0
Avg. Yld.	3.0%	2.8%	2.6%	2.8%	2.8%	2.3%	4.4%	4.5%	4.4%	5.0%	5.3%	3.9%

Shares of T. Rowe have declined \$6, or 5.9%, since our November 5th, 2025 update. The stock has traded hands with an average P/E ratio of about 13.4 times earnings in the last decade. We have lowered our target P/E to 13 from 14 to match the long-term average as the company has moderate growth potential in our opinion. With shares trading at 9.4 times earnings estimates, we forecast a valuation tailwind. Multiple expansion could increase annual returns by 6.6% through 2031.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	45%	37%	40%	38%	38%	34%	60%	64%	53%	52%	50%	50%

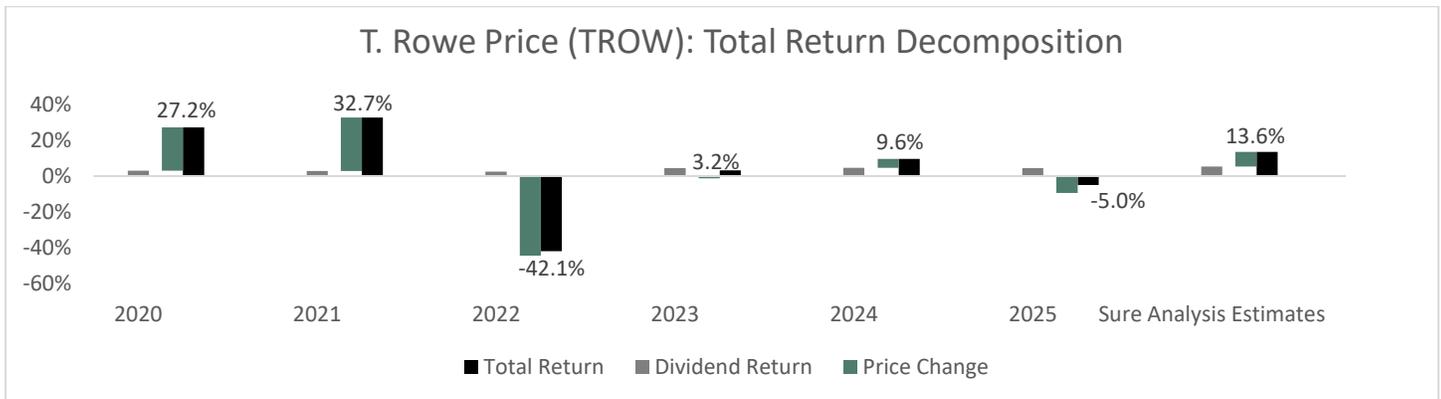

While T. Rowe has put together a solid record, asset managers do not tend to have a large competitive advantage. Fund performance and general customer stickiness help – once you invest with a company you tend to stay invested, and the benefits of switching are unknown. However, the “race to the bottom” as it relates to fees has been and will continue to be an important and ongoing challenge in the industry.

During the Great Recession T. Rowe posted earnings-per-share of \$2.40, \$1.82, \$1.65, and \$2.53 in the 2007 through 2010 stretch. This is instructive, as it shows both the cyclical nature in lesser times along with the ability to bounce back. The company's balance sheet is in excellent shape with zero long-term debt.

Final Thoughts & Recommendation

T. Rowe Price is projected to return 13.6% annually through 2031, up from our prior estimate of 12.9%. This forecast stems from a 3% earnings growth rate, a starting yield of 5.3%, and a mid-single-digit contribution from multiple expansion. T. Rowe Price has been a great business, with strong operating metrics for many years. The focus on lower fees remains a headwind for the industry, but the company has a long history of dividend growth and offers a generous yield. T. Rowe Price earns a buy rating due to total return potential and a solid dividend risk score.
