Overview & Current Events

Artesian Resources Corp. was founded in 1905 in New Castle County, Delaware. Through its subsidiaries, the company provides water, wastewater, and other services, primarily in the Delaware region. Artesian Resources sells and distributes water to residential, commercial, industrial, governmental, and utility customers throughout the state. In addition, Artesian Resources provides water for public and private fire protection in Delaware, Maryland, and Pennsylvania. The company produces 9.4 billion gallons of water annually through over 1,500 miles of water main, serving approximately 301,000 people.

On March 12th, 2026, ARTNA shared its financial results for the fourth quarter ended December 31st, 2025. The company's total operating revenue grew by 4.3% year-over-year to \$28.02 million during the quarter. The biggest driver of this topline growth in the quarter in absolute dollars was the implementation of two temporary rate increases in Delaware. These are permitted while the company awaits a decision on its 10.75% net incremental increase in revenue on its rate case filed last April with Delaware's Public Service Commission. That pushed total water sales 2.9% higher over the year-ago period to \$22.30 million for the quarter. While they had smaller impacts in absolute dollars, double-digit percentage upticks in other utility operating revenue and non-utility operating revenue also contributed to this growth during the quarter. The former (wastewater revenue) rose by 10.2% year-over-year to \$3.82 million in the quarter, which was due to the expansion of its wastewater customer base in Sussex County, Delaware, and Cecil County, Maryland. Non-utility operating revenue also climbed 10.0% higher over the year-ago period to \$1.89 million for the quarter. A fee hike on its Service Line Protection Plan and continued growth in residential customers enrolling in these protection plans made this topline growth possible. ARTNA's diluted EPS jumped 8.1% higher year-over-year to \$0.40 during the quarter.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.41	\$1.51	\$1.54	\$1.60	\$1.79	\$1.79	\$1.90	\$1.67	\$1.98	\$2.21	\$2.00	\$2.55
DPS	\$0.90	\$0.93	\$0.96	\$0.98	\$1.01	\$1.05	\$1.09	\$1.14	\$1.18	\$1.23	\$1.25	\$1.52
Shares²	9.1	9.2	9.3	9.3	9.4	9.4	9.5	10.3	10.3	10.3	10.3	11.0

Since 2016, ARTNA's diluted EPS has compounded by just over 5% annually. Moving forward, we think that this level of growth can be sustained. That's why we're modeling a 5.0% annual growth rate through 2031, off an anticipated 2026 base of \$2.00. In 2025, the company invested \$58.8 million into infrastructure upgrades (a huge amount relative to its size), including PFAS treatment facilities. Once the rate case from last April is finalized, there will likely be a reset period, which will weigh on diluted EPS. But by 2027, the company will probably file for its next cycle of Distribution System Improvement Charges. This will allow them to recover costs for what they've invested in infrastructure in 2025 and 2026.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	22.7	25.6	22.6	22.9	20.7	25.9	30.8	24.8	15.7	14.2	16.4	20.0
Avg. Yld.	2.8%	2.4%	2.7%	2.7%	2.7%	2.3%	1.9%	2.8%	3.8%	3.9%	3.8%	3.0%

In recent years, ARTNA's valuation multiple has ranged as low as the low-teens to as much as the low-30s. Since 2016, the average P/E ratio has been 22.6. Since interest rates are meaningfully higher now than they were throughout most of that time, we believe a reasonable fair value P/E ratio is about one standard deviation below the average P/E ratio of 22.6, or around 20x. Compared to the current-year P/E ratio of 16.4, this implies ARTNA's shares are moderately undervalued.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	64%	62%	62%	61%	56%	59%	57%	68%	60%	56%	63%	60%

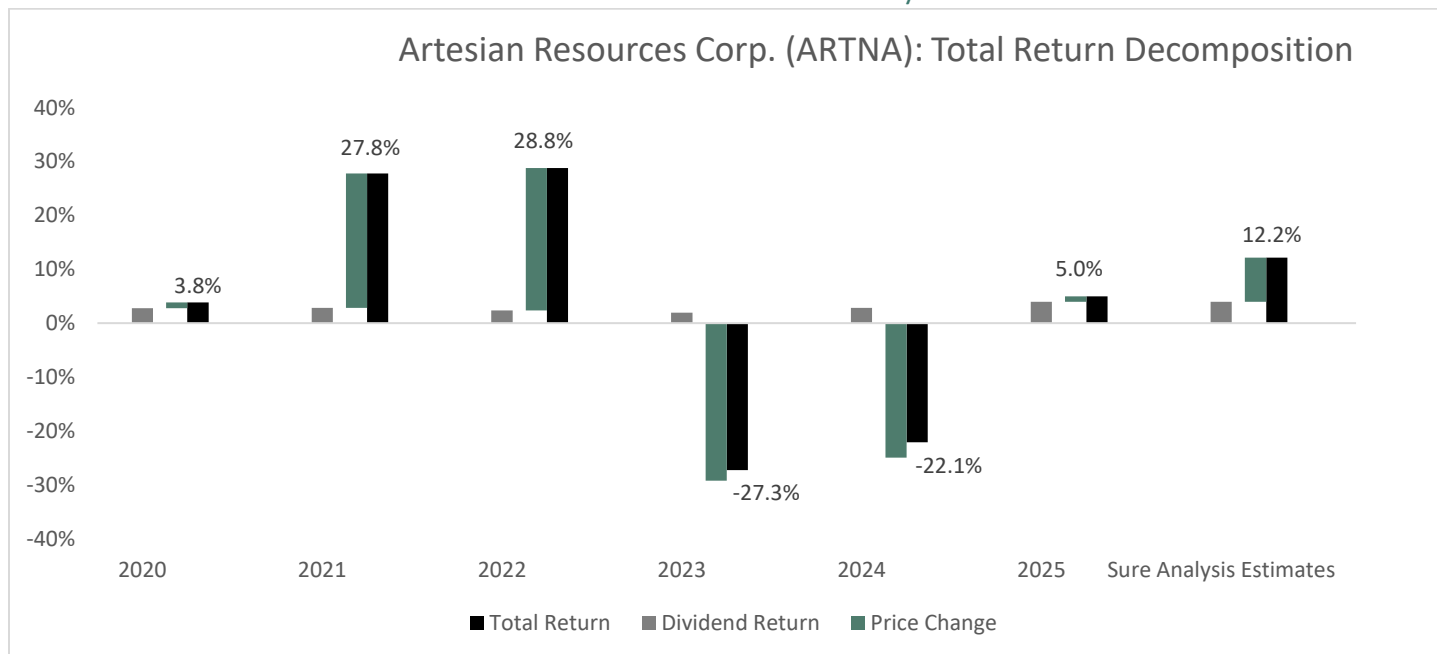

As a regulated utility, ARTNA operates under the business model of essentially being a monopoly. On the one hand, this limits competition. On the other hand, it contends with the risk of underwhelming rate case outcomes with state regulators. Overall, this business model has led to gradual growth in its diluted EPS over time.

ARTNA is financially stable, too. In 2025, the company's interest coverage ratio was 3.6x. For a regulated utility, this is indicative of solid financial health. ARTNA's dividend is also very sustainable, with the payout ratio likely to be in the low-60% range in 2026. That should give it the flexibility to extend its 33-year dividend growth streak for the foreseeable future.

Final Thoughts & Recommendation

ARTNA's 3.8% dividend yield, 5.0% annual diluted EPS growth potential, and 4.1% annual valuation multiple expansion could generate 12.2% annual total returns through 2031. Still, the weaker dividend score is what serves as our basis to maintain our Hold rating.

Total Return Breakdown by Year
