Overview & Current Events

Costco's humble beginning in a converted airplane hangar has given way to a powerhouse in an industry it helped create. Today, Costco is a diversified warehouse retailer that operates over 920 warehouses that collectively generate almost \$300 billion in annual sales. Costco's leadership in this industry has rewarded shareholders handsomely over the years as it sports a \$447 billion market capitalization.

Costco posted second quarter earnings on March 5th, 2026, and results were better than expected on both the top and bottom lines. Earnings came to \$4.58 per share, beating estimates by four cents. Revenue was up 9.2% year-over-year to \$69.6 billion, beating estimates by \$280 million.

Comparable sales for the quarter were up 6.4% on an adjusted basis in the US, 7.6% in Canada, and 7.1% outside of North America. The company's digitally enabled sales were 22.6% higher, helping to drive a 7.4% improvement for the consolidated company. Traffic was up 3.1% and the average transaction was up 4.2% worldwide.

The membership base was up to 40.4 million paid executive members, up 9.5% year-over-year, and 82.1 million total members, up 4.8%. The renewal rate was 92.1% in the US and Canada, off 10 basis points from last quarter. Worldwide, the renewal rate was 89.7%, unchanged. Membership fee income was \$1.36 billion versus \$1.19 billion a year ago, and beating consensus estimates of \$1.33 billion. Net income was \$2.04 billion versus \$1.79 billion a year ago.

We have boosted our estimate of earnings-per-share to \$20.45, which is up about 1% from our prior estimate.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$5.33	\$5.82	\$7.09	\$8.26	\$9.02	\$10.97	\$13.14	\$14.16	\$16.12	\$18.21	\$20.45	\$32.93
DPS	\$1.70	\$1.90	\$2.14	\$2.44	\$2.70	\$2.98	\$3.38	\$3.84	\$4.38	\$4.92	\$5.20	\$8.76
Shares²	438	437	442	443	444	444	444	443	443	443	443	443

We see Costco's forecasted growth as straightforward; sales growth will continue to make up most of its predicted earnings growth. Its model does not allow for much in the way of expanding profit margins because its retail pricing is intended to be as low as possible for consumers. We are forecasting 10% earnings-per-share growth annually in the coming years as strong sales numbers help drive incremental gains in operating margins.

The vast majority of Costco's operating margin dollars come from its membership fees, which continue to grow at strong rates, but are a very small fraction of total revenue. This is 100% margin revenue and fuels higher comparable sales, as well as more members and more people in the stores buying. The company does not buy back stock in any sort of meaningful quantity, so that is not a source of earnings growth. Steadily higher comparable sales should be enough to keep earnings growing at our forecast rate of 10% annually. Comparable sales gains were good again in Q2 across all geographies. Given Costco's profits are due almost entirely to membership revenue, that is the key thing to watch. Costco finally raised its membership fee, effective September 1st, 2024. Fees rose anywhere from \$5 to \$10 per year depending upon membership type, which should drive increased revenue and margins in the years to come, and indeed

has in the past year or so. Given the company's history on this topic, it is likely to be years before another increase is announced.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	29.0	27.6	28.1	27.8	33.9	34.2	40.4	34.7	55.4	51.8	49.3	40.0
Avg. Yld.	1.1%	1.2%	1.1%	1.0%	0.9%	0.8%	0.6%	0.7%	0.5%	0.5%	0.5%	0.7%

Costco's price-to-earnings multiple has been elevated for some time as investors have applied a premium to the stock due to the company's excellent performance. Costco shares are extremely expensive still, trading for a staggering 49.3 times earnings. That's well ahead of our estimate of our fair value at 40 times earnings, so we continue to see a meaningful headwind to returns from the valuation. The boost in earnings estimates hasn't been enough to offset stock share price action in terms of the valuation.

We see the yield as remaining under 1% given the valuation and rising dividend payment. We don't believe Costco will be a high-income stock anytime in the foreseeable future, but its payout growth should be robust. We note the \$10 per share special dividend paid in December of 2020, as well as the \$15 special dividend declared for January 2024.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	32%	33%	30%	30%	30%	27%	26%	27%	27%	27%	25%	27%

Costco's payout ratio is quite low at 25% for this year, and we believe it will remain near or under 30% going forward. The company has the ability to boost the dividend at a much higher rate but has thus far chosen not to. Regardless, Costco's dividend is ultra-safe, but of course, the yield is unattractive given the enormous valuation.

Costco's competitive advantage is in its leadership position in a category it created and as Sam's Club closes stores, that position should strengthen. It is not immune from a recession, but damage during the Great Recession was slight. Costco thrived during the worst of the pandemic recession and exited the recession in a stronger competitive position.

Final Thoughts & Recommendation

Costco is a decent growth stock that is trading well ahead of our estimate of fair value. We forecast 6.1% total annual returns over the next five years, as the company's impressive growth rate of 10% drives returns, with the 0.5% yield and offsetting 4.1% valuation headwind. With 6.1% total returns, we are sticking with a hold rating.
