Overview & Current Events

Solstice Advanced Materials, Inc. is a specialty chemicals and advanced materials company. The company was formed through the spinoff of Honeywell's (HON) advanced chemical and refrigerant solutions businesses. Last October, HON completed the spinoff of Solstice Advanced Materials, Inc. under the ticker symbol SOLS. With around 4,000 employees and more than 3,000 customers in 120-plus countries and territories around the world, it's a global business. The company serves a variety of end markets: These include the HVAC, automotive, alternative energy, construction, chemicals, semiconductors, and life science & medical end markets. SOLS operates the following two segments:

1. **Refrigerants & Applied Solutions:** The RAS segment manufactures and sells low global warming potential refrigerants, solvents, aerosol materials, and blowing agents. It also provides LGWP refrigerants, aerosol propellants, cleaning solvents, and high-barrier pharmaceutical packaging materials under the eponymous Solstice brand, as well as the Genetron and Aclar brands. This segment made up approximately 72% of the \$3.89 billion in net sales logged in 2025.
2. **Electronic & Specialty Materials:** The ESM segment provides electronic materials, laboratory life science chemicals, and high-strength fibers to customers in various end markets. Key brands include Spectra, Fluka, and Hydranal. The segment comprised the remaining ~28% of its total 2025 net sales.

On February 11th, SOLS released its financial results for the fourth quarter ended December 31st, 2025. The company's net sales rose by 8.1% over the year-ago period to \$987 million in the quarter. This was mostly fueled by a 9.9% rise in RAS segment net sales during the quarter. Segment organic net sales advanced 8% for the quarter, which was made possible by respective 20% and 39% growth rates in the refrigerants and alternative energy services subsegments (the former was led by robust volume and pricing as the industry transitioned toward low-global warming potential solutions, and the latter benefited from favorable pricing and increased volume in nuclear conversion services). The remaining growth was due to favorable foreign currency translation. ESM segment net sales increased by 3.7% year-over-year to \$277 million in the quarter. Outsized growth in Electronic Materials from volume growth was somewhat neutralized by a 10% decline in Safety & Defense Solutions stemming from lower volumes due to order timing. The company's diluted EPS dropped by 66.7% over the year-ago period to \$0.26. That missed the analyst consensus by \$0.10 and was due to spin-off taxes and transitory stand-up costs caused by SOLS only beginning to operate as an independent entity in the second half of last year, resulting in one-time transition service agreement fees that had to be paid to HON.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	-	-	-	-	-	-	-	-	-	\$1.49	\$2.67	\$4.92
DPS	-	-	-	-	-	-	-	-	-	-	\$0.30	\$0.48
Shares³	-	-	-	-	-	-	-	-	-	158.7	158.7	152.0

¹ Estimate.

² Dividend growth streak inherited from HON.

³ Share count is in millions.

Solstice Advanced Materials, Inc. (SOLS)

Updated March 13th, 2026, by Kody Kester

As a spinoff, SOLS has a very brief time as a standalone publicly traded company. Discerning future growth prospects requires considering the industry in which the company operates. The market research firm, Data Bridge Market Research, anticipates that the global refrigerant market will compound by 7.9% annually from \$28.9 billion in 2025 to \$53 billion by 2032. As a leader in the next generation of refrigerants (HFOs), we believe SOLS is positioned to capture market share over time. Other high-growth verticals, like semiconductors, are another growth catalyst for the company. This is why we think EPS can grow by 13% annually through 2031, off an anticipated 2026 base of \$2.67.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	-	-	-	-	-	-	-	-	-	-	27.3	20.0
Avg. Yld.	-	-	-	-	-	-	-	-	-	-	0.4%	0.5%

Since there is no historical valuation precedent, valuing SOLS is tricky. We're reasonably confident with a fair value P/E ratio of approximately 20. This is because the company looks to have plenty of growth catalysts in its base business of refrigerants and an equally strong growth outlook for end markets, such as semiconductors. From the current year P/E ratio of 27, shares are trading well ahead of our fair value estimate.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	-	-	-	-	-	-	-	-	-	-	11%	10%

One key competitive advantage for SOLS is its intellectual property. The company's 5,700 and counting patents and pending applications across its portfolio protect its differentiated technologies across refrigerants, fibers (via Spectra), and packaging (Aclar). SOLS also provides high-value but low-volume materials. That means these inputs are critical, and quality matters more than cost. This market niche comes with high switching costs, which usually translates into customer loyalty.

SOLS' financial health is also reasonably solid. As of December 31st, 2025, the company's net leverage ratio over the past 12 months was 1.5x. SOLS also had \$1.5 billion in total liquidity against nearly \$2 billion in total debt. As a result, SOLS' inaugural credit rating from S&P was BB+ (one notch below investment-grade), with a BBB- issue-level rating on the senior secured credit facilities.

We believe that the company will hike its dividend by about 10% annually, off its 2026 base of \$0.30. This gives it plenty of breathing room to fund organic growth, acquisitions, and incremental share repurchases as well.

Final Thoughts & Recommendation

SOLS' 0.4% dividend yield, 13.0% annual EPS growth prospects, and 6.0% annual valuation multiple downside potential could position it for 6.6% annual total returns through 2031. This is why we're issuing a Hold rating.
