Overview & Current Events

Walker & Dunlop, Inc. (WD) is a U.S. commercial real estate finance company that specializes in multifamily and other property financing solutions. The company originates, sells, and services a broad range of loan products, including first mortgage, second trust, supplemental, construction, mezzanine, preferred equity, and small-balance loans for real estate owners and developers. In addition to lending, WD provides mortgage banking, investment sales brokerage, appraisal and valuation services, and asset management. Its operations span multiple segments, including Capital Markets, Servicing and Asset Management, and Corporate. Headquartered in Bethesda, Maryland, the company is a primary partner to the Government-Sponsored Enterprises (GSEs), consistently ranking as the #1 Fannie Mae DUS Lender and a top-three Freddie Mac Optigo lender as of 2025. As of December 31st, 2025, WD's total managed portfolio was approximately \$162.6 billion (\$144 billion servicing portfolio and \$18.6 billion in assets under management).

On February 26th, 2026, WD shared its financial results for the fourth quarter ended December 31st, 2025. The company's total revenue decreased by 0.4% year-over-year to \$340 million during the quarter. WD benefited from a 36% spike in total transaction volume (reaching \$18.3 billion) in the quarter. Since this growth was led by debt brokerage and property sales rather than Fannie/Freddie originations (debt brokerage fees are typically 20 to 30 basis points lower than origination fees earned on Fannie/Freddie loans), the revenue didn't follow. Mortgage servicing rights revenue also took a hit because borrowers shifted more heavily toward five-year loans versus the 10-year loans to maintain optionality for future refinancing, which is significant because shorter loans lead to lower MSR capitalization rates for WD. The company's adjusted core EPS dropped 79.1% over the year-ago period to \$0.28 for the quarter. This was due to one-time charges stemming from Freddie Mac fraud indemnification and asset impairments. The day before Q4 earnings, WD increased its quarterly dividend per share by 1.5% to \$0.68. This represented the eighth consecutive year of dividend growth.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$3.57	\$6.47	\$4.96	\$5.45	\$7.69	\$8.18	\$6.36	\$4.68	\$4.97	\$3.50	\$3.75	\$7.22
DPS	-	-	\$1.00	\$1.20	\$1.44	\$2.00	\$2.40	\$2.52	\$2.60	\$2.68	\$2.72	\$3.31
Shares²	29.6	30.0	29.5	30.0	30.7	32.1	32.4	32.9	33.2	33.4	34.1	34.5

Looking ahead, we believe that WD's adjusted core EPS can compound by 14% annually through 2031, off an anticipated 2026 base of \$3.75. It's worth noting that 2016 through 2020 inputs were diluted EPS, while 2021 and beyond are adjusted core EPS (the company made this change to better reflect volatile, non-cash items). The macro tailwind for the company is a wave of commercial real estate debt that will be maturing between now and the end of 2027. As the top Fannie Mae lender, WD is well-positioned to refinance these loans. Management is also leaning more heavily into growing the asset management business, which will allow it to compound earnings without putting its own capital at risk.

¹ Estimated based on past dividend dates.

² Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	8.7	7.4	8.7	11.9	12.0	18.5	12.3	23.7	19.3	16.8	11.3	12.0
Avg. Yld.	-	-	2.3%	1.8%	1.6%	1.3%	3.1%	2.3%	2.7%	4.6%	6.4%	3.8%

Since 2016, WD's shares have traded at as low as the high single-digits to as high as the low-20s. Over that time, the average P/E ratio was nearly 14. Moving forward, we think that a reasonable fair value multiple for WD is around 12. Relative to the current-year P/E ratio of 11.3, shares look to be slightly discounted.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	-	-	20%	22%	19%	25%	38%	54%	52%	77%	73%	46%

WD's competitive advantage lies in its comprehensive service offerings and strong relationships with GSEs like Fannie Mae and Freddie Mac. These partnerships enable the company to provide clients with a diverse range of financing solutions, enhancing its market position. What's more, WD's investments in technology and data analytics have streamlined operations and improved client services, further distinguishing it from competitors. That said, the company is far from recession-proof as a downturn in the commercial real estate market would likely weigh heavily on it.

While WD has raised its dividend for eight consecutive years, its payout ratio is currently elevated, with it positioned to be in the low-70% range in 2026. This is likely to meaningfully weigh on dividend growth for the foreseeable future.

Final Thoughts & Recommendation

WD's 6.4% dividend yield, 14.0% annual adjusted core EPS growth prospects, and 1.1% annual valuation multiple upside potential could generate 19.1% annual total returns through 2031. However, the F Dividend Risk Score is why we're reiterating our Hold rating, rather than issuing a Buy rating.
