Overview & Current Events

In 1933, Jim Ryder made a \$35 down payment on one truck. Today that has transformed into a \$9.4 billion commercial transportation, logistics and supply chain management solutions company with 250,000+ vehicles and 55 million square feet of warehouse space. The business is divided into three segments – Fleet Management (FMS), Dedicated Transportation (DTS) and Supply Chain Solutions (SCS) – providing commercial truck rental, truck leasing, used trucks for sale, and last mile delivery services. Ryder generated \$12.7 billion in revenue last year.

On April 23rd 2026, Ryder reported results for Q1-2026. Its revenue remained essentially flat vs. the prior year's quarter but its earnings-per-share grew 3%, from \$2.47 to \$2.54, thanks to share repurchases. Ryder exceeded the analysts' consensus by \$0.27. It has exceeded the analysts' consensus in 19 of the last 20 quarters. Management improved its already strong guidance for 2026. It still expects revenue growth of 3% but raised its guidance for adjusted earnings-per-share from \$13.45-\$14.45 to \$14.05-\$14.80. Accordingly, we have raised our forecast from \$13.95 to \$14.50.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$5.41	\$4.53	\$5.79	\$1.01	-\$0.27	\$9.58	\$16.37	\$12.95	\$12.00	\$12.92	\$14.50	\$19.40
DPS	\$1.70	\$1.80	\$2.12	\$2.20	\$2.24	\$2.28	\$2.40	\$2.66	\$3.04	\$3.44	\$3.64	\$4.40
Shares²	53.5	53.0	53.1	53.3	52.4	54.0	49.3	45.4	43.4	40.8	39.0	37.0

Ryder has grown its earnings-per-share by an average compound rate of 10.2% per year over the last decade. However, the company has a volatile performance record. Earnings plunged in 2019, as the company dealt with a significant impact from residual value changes. Moreover, the company incurred losses in 2020 due to the pandemic.

Ryder faces challenges from increasing costs, more stringent regulation, and disruptive technologies; not to mention softer demand in the power vehicle resale market. And this was before the pandemic. While the company is considered essential, providing supply chain and transportation services, demand is volatile.

Of course, there are opportunities as the company offers solutions for driver and labor shortages in the industry for the short to intermediate-term, and Ryder can play a key role in the ongoing shift toward e-commerce and asset sharing / autonomous vehicles in the long-term. The company paid the same \$0.15 quarterly dividend from 1989 through 2004 but began raising it in 2005. In the last decade, the company has grown its dividend at an 8.1% average annual rate.

Due to the high comparison base formed by the expected earnings this year, we assume 6.0% average annual growth of earnings-per-share over the next five years, below the historical growth rate of the company.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	12.1	16.6	12.2	---	---	8.1	4.8	7.3	13.8	12.8	16.8	12.0

Ryder System, Inc. (R)

Updated April 24th, 2026, by Aristofanis Papadatos

Excluding 2019 and 2020, shares of Ryder have traded hands with an average price-to-earnings ratio of 11.0, with a range from 4.8 to 16.6. We are using 12 times earnings as a fair value multiple. The stock is currently trading at a price-to-earnings ratio of 16.8, which is much higher than our assumed fair valuation level. If Ryder trades at our fair valuation level in five years, it will incur a -6.5% annualized drag due to the contraction of its price-to-earnings ratio.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	31%	40%	37%	---	---	24%	15%	21%	25%	27%	25%	23%

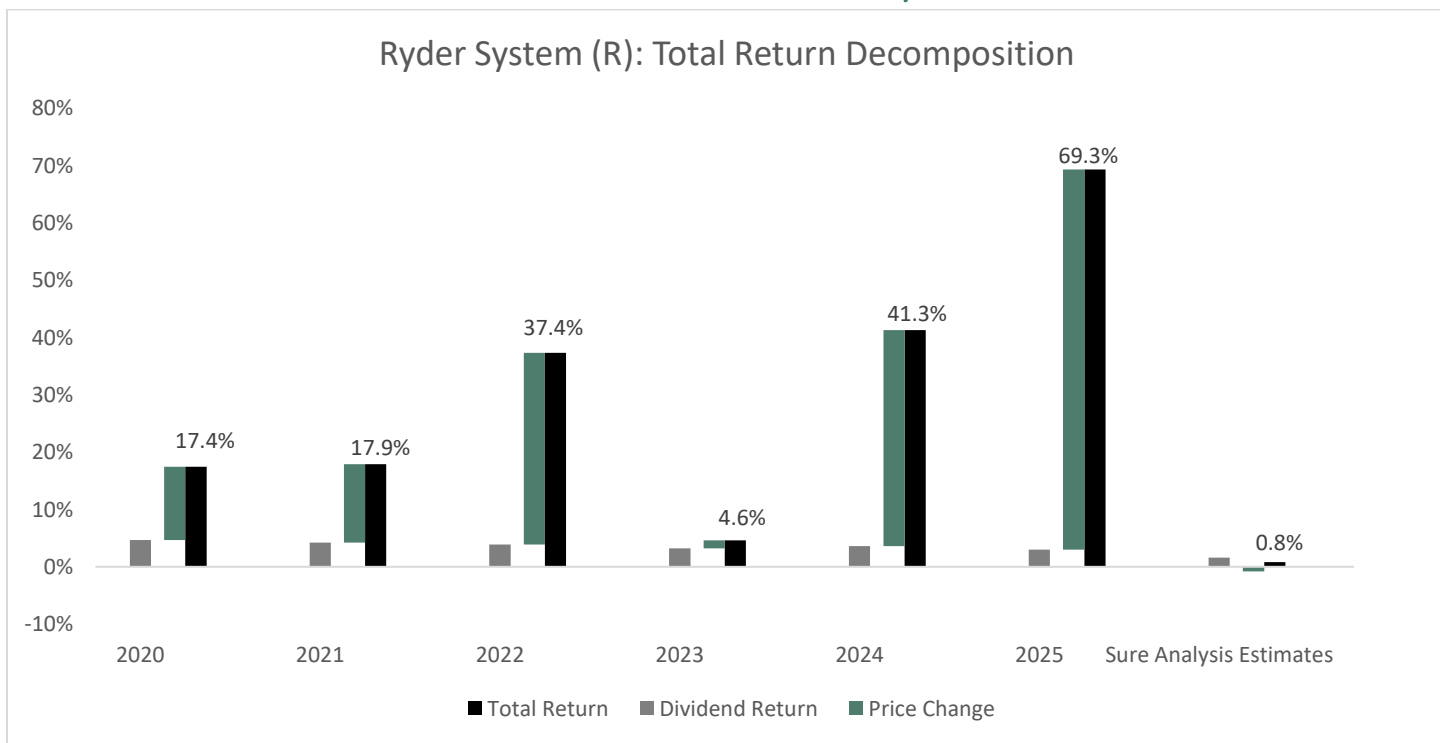

Ryder faces competition from several companies in the logistics and transportation business, such as Landstar System and Schneider National. There have been three instances – 2008-09, 2015-17 and 2018-19 – in which Ryder reported a material decline in earnings-per-share (-65%, -26% and -83%, respectively). Moreover, the company incurred losses in 2020. While this is natural in a cyclical industry, we are encouraged by Ryder's ability to rebound. The company has gotten back to normalized earnings power, so now the dividend is reasonably covered once again.

Of particular note to Ryder's safety is the company's interest expense, which totaled \$261 million in 2020 against operating income of \$487 million. The company has suggested that it is comfortable with this type of significant leverage – targeting a debt-to-equity ratio of 200% to 250%. Ryder is thriving right now so it can easily service its debt but its high leverage could mean that the company might come under pressure during a severe future downturn.

Final Thoughts & Recommendation

The stock of Ryder has nearly doubled off its bottom last year thanks to the enthusiasm of the market over the return of the company to growth mode. Ryder could offer an average annual return of 0.8% over the next five years thanks to 6.0% growth of earnings-per-share and a 1.5% dividend, partly offset by a -6.5% valuation drag. The stock maintains its hold rating. We reiterate that investors should always be aware of the high cyclicality and the material debt load of the company.
