Overview & Current Events

Headquartered in Berwyn, Pennsylvania, AMETEK, Inc. (AME) was established in 1930 as American Machine and Metals. AME is a global manufacturer of electronic instruments and electromechanical devices with operations across North America, Europe, Asia, and South America. The company's diverse product offerings are organized into two segments: Electronic Instruments Group (EIG), which designs advanced instruments for various markets including process, power, industrial, and aerospace (~65% of total Q1 2026 sales); and Electromechanical Group (EMG), which provides precision motion control solutions, thermal management systems, and specialty metals to sectors such as aerospace, defense, and medical (~35% of Q1 2026 sales). Roughly half of AME's sales is generated outside the U.S., driven by continuous investment in sales and service in key growth regions.

On April 30th, AME shared its earnings report for the first quarter ended March 31st, 2026. The company's sales rose by 11.3% over the year-ago period to \$1.93 billion during the quarter. This was driven by a combination of healthy organic growth and strategic acquisitions in the quarter. Broad-based demand helped organic sales to increase by 5% year-over-year for the quarter (2% organic sales growth in the EIG segment from defense electronics/semiconductor markets and 11% organic sales growth from automation and engineered solutions/aerospace and defense components). The integration of FARO Technologies contributed another five percentage points during the quarter (this deal expanded AME's capabilities in 3D measurement and imaging for the aerospace and architecture sectors). The company's adjusted diluted EPS climbed 12.6% higher over the year-ago period to \$1.97 in the quarter. That topped the analyst consensus for the quarter by \$0.07. In February, AME upped its quarterly dividend per share by 9.7% to \$0.34. This represents its seventh consecutive year of dividend growth.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.30	\$2.61	\$3.66	\$4.19	\$3.95	\$4.85	\$5.68	\$6.38	\$6.83	\$7.43	\$8.14	\$12.52
DPS	\$0.36	\$0.36	\$0.56	\$0.56	\$0.72	\$0.80	\$0.88	\$1.00	\$1.12	\$1.24	\$1.36	\$2.19
Shares¹	229.4	231.2	227.1	229.1	230.5	231.7	230.1	230.9	230.7	229.0	229.2	227.0

In the last decade, AME's adjusted diluted EPS have compounded by almost 14% annually. In recent years, the law of large numbers has led to a deceleration in growth to roughly 11%. Moving forward, we believe that AME can compound its adjusted diluted EPS by at least 9.0% annually through 2031, off an anticipated 2026 base of \$8.14. This accounts for modest organic topline growth, the recent acquisition of Indicor Instrumentation, set to close in the second half of 2026 (an all-cash transaction for \$5 billion), a record backlog of \$3.87 billion, and incremental margin expansion over time. It also takes into consideration some cyclicity in industrial end markets.

¹ Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	21.1	27.8	18.3	24.1	30.6	30.3	24.6	25.9	26.3	28.1	28.5	26.0
Avg. Yld.	0.7%	0.5%	0.8%	0.6%	0.6%	0.6%	0.6%	0.6%	0.6%	0.6%	0.6%	0.7%

Since 2016, AME's shares have traded at a P/E ratio as cheap as the high-teens to as expensive as the low 30s. Over that time, the average P/E ratio was roughly 26. Looking ahead, we believe that such a multiple can be maintained as margin expansion (up 50 basis points year-over-year to 26.8% in Q1 2026) can offset the slowdown in growth versus five or 10 years ago. Relative to the current-year P/E ratio of 28.5, this implies shares are moderately overvalued right now.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	16%	14%	15%	13%	18%	16%	15%	16%	16%	17%	17%	17%

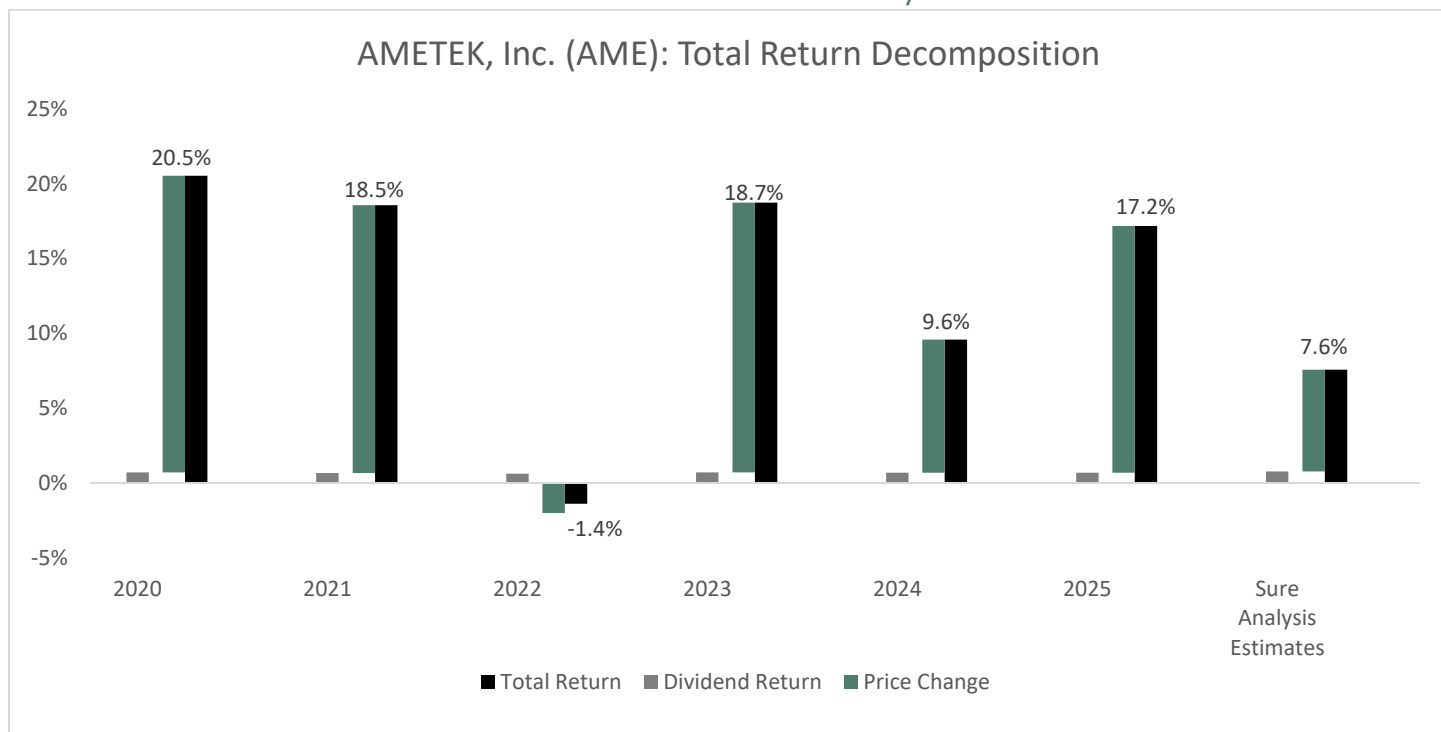

Rather than competing on price in broad markets, AME focuses on niche differentiation. They provide mission-critical components that represent a small fraction of a customer's total cost but are essential for the system to function. Since the cost of skimping on these parts is high, this provides AME with solid pricing power.

The company is also financially stable. AME's interest coverage ratio was 24.6x in Q1 2026. That earns it a BBB+ S&P credit rating with a stable outlook. AME's dividend is also very safe, with the adjusted diluted EPS payout ratio likely to be in the upper-teens in 2026. That's why we think it can deliver 10% annual payout growth for the foreseeable future, which would be about in line with the five-year CAGR of 11.2%.

Final Thoughts & Recommendation

AME's 0.6% dividend yield, 9.0% annual adjusted diluted EPS growth prospects, and 1.9% annual valuation multiple contraction potential could deliver 7.6% annual total returns through 2031. As a result, we're maintaining our Hold rating.
