Overview & Current Events

Artisan Partners Asset Management Inc. is a global investment management firm that provides a broad range of high value asset investment strategies across several asset classes. Artisan executed its initial public offering on March 1st, 2013. The company has been a very shareholder-friendly allocator of capital since then, paying special dividends of \$0.95 per share in 2015, \$0.40 per share in 2016, \$0.36 per share in 2017, \$0.79 per share in 2018, \$1.03 in 2019, \$0.31 in 2020, \$0.72 in 2021, \$0.35 for 2022, \$0.35 in 2023, \$0.50 in 2024, \$0.57 in 2025, and \$1.58 in 2026 in addition to its ample quarterly dividend. Artisan generates about \$1.2 billion in annual revenue and trades with a market capitalization of \$3 billion.

Artisan posted first quarter earnings on April 29th, 2026, and results were weaker than expected on both the top and bottom lines. Adjusted earnings-per-share came to 87 cents, but that missed estimates by six cents. Revenue was up 9.3% year-over-year to \$303 million, but that also missed by \$1.01 million.

Assets under management ended the quarter at \$173 billion, down 4% from the December quarter but 7% higher year-over-year. Average AUM was \$182 billion, up 1% from December and up 9% from a year ago.

Adjusted operating expenses were 4% higher from December, primarily from Grandview Property Partners, as well as seasonal expenses and compensation costs.

The company noted firm-wide net outflows of \$3.1 billion, attributable to a few equity strategies where the firm's clients were de-risking.

We see \$4.15 in adjusted earnings-per-share for this year after Q1 results, which would be a record, if achieved.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.13	\$2.41	\$2.94	\$2.67	\$3.30	\$5.03	\$3.11	\$2.89	\$3.55	\$3.93	\$4.15	\$4.58
DPS	\$2.40	\$2.40	\$2.40	\$2.36	\$2.79	\$3.92	\$3.67	\$2.66	\$2.82	\$3.13	\$3.08	\$3.40
Shares¹	42	51	54	56	63	67	68	69	70	71	72	75

Artisan has failed to generate meaningful per-share growth since its initial public offering, due largely to a ballooning share count. Because of this, we are hesitant to expect significant growth from the firm moving forward. Our 5-year earnings-per-share growth estimate for Artisan is 2%, however, as we see the company's rising margins and focus on expense management as driving outsized earnings growth in the coming years, along with strong equity markets supporting higher AUM.

Income investors should note that the dividend figures listed in the above table exclude the numerous special dividends paid by the company since its IPO in 2013. Artisan pays a regular quarterly dividend, but it also pays out significant special dividends annually. The company's policy is to pay out 80% of the cash the company generates. At the end of the year, the board considers several factors, and determines a variable special dividend. For instance, the January 2026 payment was huge at \$1.58 per share, making the total dividend yield closer to 13% rather than the 8.6% headline yield.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	13.7	13.0	10.9	10.2	10.6	10.0	9.5	15.3	12.1	10.4	8.7	11.0
Avg. Yld.	8.3%	7.7%	7.5%	8.9%	8.0%	7.8%	12.3%	6.0%	6.6%	7.7%	8.6%	6.7%

Like many firms, Artisan traded at elevated levels for some time following its initial public offering. Because of this, we do not believe that the company's early historical valuation multiples are indicative of its fair value. Instead, we believe that a fair value for Artisan lies somewhere around 11 times earnings. The company is trading at a price-to-earnings ratio of 8.7 today. With the \$3.08 annualized dividend, the stock is yielding 8.6%, excluding any special dividends. We also note that because of Artisan's unusual policy of paying out most of its earnings on a variable basis, we could potentially see higher dividend payments than currently forecast if equity markets perform well. It works in the other direction, too, and actual dividends could be lower than forecast.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	113%	100%	82%	88%	85%	78%	118%	92%	79%	80%	74%	74%

Artisan's payout ratio is 74% of earnings at current projections, but investors should keep in mind that Artisan generally pays special dividends at the end of the year, and that its quarterly dividend policy is variable. Thus, how the payout ratio performs depends significantly upon how much earnings the company can generate.

Artisan wasn't public during the Great Recession, but we expect the damage to earnings could be meaningful during a prolonged recession that brings with it lower equity prices. Artisan is a highly cyclical company, so investors looking for safety and defensiveness would look elsewhere. Adding to this risk, Artisan's competitive advantage of its well-performing funds hasn't resonated with customers. We do note that Artisan performed extremely well in 2020, and 2021 produced record earnings, but 2023 was back on track with historical results.

Final Thoughts & Recommendation

Artisan can be seen as a leveraged play on the equity markets. When markets are rising, the company should benefit from ballooning AUM due to market returns. Conversely, the company will likely perform very poorly during a bear market, as it did at the end of 2018, and indeed in 2022. We are reiterating the stock at a hold rating following Q1 results with an attractive total return outlook. Returns should accrue from 2% earnings growth, the 8.6% yield, and a 4.9% tailwind from the valuation.
