## Overview & Current Events

American Water Works is the largest and most geographically diverse, publicly traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. The company provides drinking water, wastewater, and other related services to approximately 14 million people across 24 states, including regulated operations in 14 states. Its regulated business includes approximately 3.6 million active customer connections, consisting of 3,242 thousand water customers and 330 thousand wastewater customers. The company also provides water and wastewater services to the U.S. government and military through 18 installations. American Water Works generated \$5.14 billion in revenues last year and is based in Camden, New Jersey.

On April 29<sup>th</sup>, 2026, American Water Works raised its dividend by 8.2% to a quarterly rate of \$0.895.

On the same day, American Water Works posted its Q1 results for the period ending March 31<sup>st</sup>, 2026. Operating revenues rose by 5.7% year-over-year to \$1.21 billion from \$1.14 billion in 2025. The increase in revenues was driven by i) authorized revenue increases from completed general rate cases and infrastructure proceedings to recover incremental capital and acquisition investments, and ii) incremental revenue from closed acquisitions.

First quarter GAAP EPS came in at \$1.00, compared to \$1.05 in 2025, while adjusted EPS was \$1.01 compared to \$1.02 in the prior-year period. Revenue growth in the Regulated Businesses was offset by higher operating costs, depreciation, and financing costs to support the company's capital investment plan. During Q1, the company invested \$652 million and continued to target approximately \$3.7 billion of total investment across its footprint in 2026, including acquisitions. For FY2026, management reaffirmed its adjusted EPS guidance range of \$6.02 to \$6.12, and reaffirmed its long-term EPS and dividend growth targets of 7% to 9%. The company noted continued progress on the pending Essential Utilities merger, including receipt of the first state regulatory approval in Kentucky, while the transaction remains subject to additional customary regulatory approvals.

## Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
<b>EPS</b>	\$2.63	\$2.39	\$3.15	\$3.43	\$3.91	\$6.96	\$4.51	\$4.90	\$5.39	\$5.69	<b>\$6.07</b>	<b>\$8.92</b>
<b>DPS</b>	\$1.47	\$1.62	\$1.78	\$1.96	\$2.15	\$2.36	\$2.57	\$2.78	\$3.00	\$3.25	<b>\$3.58</b>	<b>\$5.26</b>
<b>Shares<sup>1</sup></b>	179.0	179.0	180.0	181.0	181.0	182.0	182.0	193.0	195.0	195.0	<b>195.0</b>	<b>200.0</b>

American Water Works has a highly stable and robust track record both in terms of its profitability and its dividend payments. The company enjoys an extremely resilient business model due to water being a necessity both for residential and industrial usage, as well as a mission-critical asset for the military. As a result, American Water has been able to grow its network and operations with limited risks. Over the next ten years, the company expects to invest \$46 billion to \$48 billion in renewing and upgrading its water and wastewater infrastructure, enhancing operational efficiency through new technologies, ensuring water quality and system resiliency, and expanding its overall operations.

Updated April 30<sup>th</sup>, 2026, by Nikolaos Sismanis

Management continues to expect EPS to grow by about 7%-9% annually over the long term, powered by 8%-9% from rate base growth and 2% from regulated acquisitions. They have also mentioned the potential from additional growth from “maximizing revenue opportunities”. We have utilized an EPS CAGR of 8.0% in our calculations, which is the mid-point of management’s guidance.

The dividend has grown annually over the past 18 years, at a 5 and 10-year CAGR of 8.7% and 9.2%, respectively. Management intends to grow the dividend between a rate of 7% and 9% over the long term, which matches their EPS growth outlook. Thus, we have set our expected growth rate at 8% through 2031.

## Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
<b>Avg. P/E</b>	28.5	32.2	27.3	33.8	32.7	24.4	34.4	28.5	24.4	24.4	<b>21.9</b>	<b>22.0</b>
<b>Avg. Yld.</b>	2.0%	2.1%	2.1%	1.7%	1.7%	1.4%	1.7%	2.0%	2.3%	2.3%	<b>2.7%</b>	<b>2.7%</b>

American Water Works' valuation has hovered at rather inflated levels over the past decade. This has also been the case with all of the company's industry peers, which have also traded at quite rich multiples. We believe this is due to Wall St. treating water stocks (along with their dividends) as ultra-safe investments due to their high operational predictability. Likely due to higher interest rates, most water stocks, along with AWK, have witnessed a correction in their valuation in recent years. We believe the stock is fairly valued today.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
<b>Payout</b>	56%	68%	57%	57%	55%	34%	57%	57%	56%	57%	<b>59%</b>	<b>59%</b>

American Water’s dividend can be viewed as extremely safe. The payout ratio stands at 59%, and the company has a very clear and predictable path towards growing its EPS. Its cash flows are of high quality due to water being an essential commodity, with much-anticipated consumption rates and robust pricing power. Additionally, the company enjoys a rock-solid competitive advantage, operating in an oligopolistic industry, which is also very capital intensive and hence almost forbids new market participants. The company is the biggest amongst its peers, while its relationship with the government also adds to its already great moat. We expect American Water to deliver resilient results even through a prolonged recession. The company is not meaningfully correlated to the underlying economy. Hence, the excellent results during 2020 and 2021 despite COVID-19.

## Final Thoughts & Recommendation

American Water Works has several attractive qualities. We don’t know how and if the merger with Essential Utilities will play out. Therefore, under “normal conditions” and considering management’s reaffirmed medium-term guidance and the dividend, we expect annualized returns of 10.5% through 2031. We have assigned a buy rating to the stock. We highlight that AWK offers one of the most predictable future total return-return profiles among dividend-paying stocks.
