Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. Mueller's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates around \$1.43 billion in annual sales and is based in Atlanta, Georgia. Mueller's fiscal year ends every September 30th.

On May 5th, 2026, Mueller Water Products reported its fiscal Q2 results for the period ending March 31st, 2026. Revenues came in at \$384.4 million, which was a year-over-year increase of 5.5%. The Water Management Solutions segment posted sales of \$166.1 million, up 12.2% year-over-year. This increase was primarily due to increased volumes and higher pricing across most product lines. The Water Flow Solutions segment posted sales of \$218.3 million, an increase of 1.0% compared to last year. This increase was primarily driven by higher pricing across most product lines, partially offset by lower volumes. Due to higher pricing, manufacturing efficiencies and increased volumes, EPS came in at \$0.38 compared to \$0.33 last year. Adjusted EPS was \$0.40 for the quarter.

For Fiscal 2026, Mueller reiterated its total net sales guidance of between \$1.47 billion and \$1.49 billion, representing growth of 2.8% to 4.2% compared to fiscal 2025. The company raised its adjusted EBITDA expectations to between \$360 million and \$365 million for the year. Free cash flow as a percentage of adjusted net income is now expected to exceed 70% in fiscal 2026. Based on these estimates, we forecast EPS of \$1.45 for fiscal 2026.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$0.40	\$0.77	\$0.67	\$0.40	\$0.45	\$0.44	\$0.49	\$0.55	\$0.74	\$1.23	\$1.45	\$1.85
DPS	\$0.10	\$0.15	\$0.19	\$0.20	\$0.21	\$0.22	\$0.23	\$0.24	\$0.26	\$0.27	\$0.28	\$0.34
Shares¹	161.3	160.1	158.2	157.8	157.8	158.4	158.0	156.8	156.9	157.5	156.4	152.0

Despite Mueller's revenues modestly growing over the past few years, they are still near the same levels they were a decade ago. The company has sustained a positive bottom line since 2015, but growth has lagged. The industry in which Mueller operates is very mature, with little to no expansion prospects. Hence apart from acquisitions, the company has few growth avenues. Also, EPS could come under pressure if the company isn't able to match higher material costs with adequate price increases. Still, driven by growing revenues, we estimate EPS growth of 5% in the medium-term.

Mueller has never cut its dividend since its IPO. It has grown annually over the past 10 years, though at a humble rate since over the last five years. We expect DPS growth of around 4% going forward, considering Mueller's limited profitability growth catalysts ahead. Continuous buybacks could contribute to EPS growth, but only \$10 million worth of stock was bought in both fiscal 2023 and fiscal 2024, and another \$15 million in fiscal 2025.

¹ Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	29.7	15.6	17.2	26.2	22.5	48.0	25.1	22.8	21.3	18.4	18.9	18.0
Avg. Yld.	0.8%	1.3%	1.7%	1.9%	2.0%	1.5%	1.9%	1.9%	1.6%	1.2%	1.0%	1.0%

Over the past decade, Mueller's valuation multiple has fluctuated based on profitability expectations. Currently, shares trade at 18.9 times our expected FY2026 EPS, despite limited growth prospects. We believe a fair valuation would be 18 times EPS. We don't believe the company's thin growth prospects warrant a premium. Still, a premium has historically been attributed to water-related investments attracting investor interest for their mature and mission-critical business models. We believe the stock's yield will likely remain low overall as well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	25%	19%	28%	50%	47%	50%	47%	44%	35%	22%	19%	18%

We consider the stock's dividend relatively safe even as the payout ratio has moved higher over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller's total debt position has been declining consistently, from \$1.3 billion in 2006 to \$452.4 million as of the latest quarter. The company also has no outstanding debt maturities prior to June 2029, which should allow for flexible capital allocation in the medium-term.

Final Thoughts & Recommendation

Mueller Water Products possesses certain attractive qualities, such as robust revenues, an improving balance sheet, and a healthy dividend payout ratio. However, moving forward, we forecast annualized returns of just 5.0%, as the starting dividend yield and modest growth estimates could be offset by a valuation headwind. We rate MWA as a hold.
