Dividend Risk Score:	B	Sector:	Utilities	Rating:	Buy

Overview & Current Events

New Jersey Resources provides natural gas and clean energy services, transportation, distribution, asset management and home services through its five main subsidiaries. The company owns both regulated and nonregulated operations. NJR's principal subsidiary, New Jersey Natural Gas (NJNG), owns and operates natural gas transportation and distribution infrastructure serving over half a million customers. NJR Clean Energy Ventures (CEV) invests in and operates solar projects, to provide customers with low-carbon solutions. NRJ Energy Services manages a portfolio of natural gas transportation and storage assets, as well as provides physical natural gas services to customers in North America. The midstream subsidiary owns and invests in several large midstream gas projects. Finally, the home services business provides heating, central air conditioning, water heaters, standby generators, and solar products to residential homes. New Jersey Resources was founded in 1952 and has paid a quarterly dividend since. The company has increased its annual dividend for 30 consecutive years and has a market capitalization of \$5.7 billion. NJR trades on the NYSE and has more than 1,300 employees.

On November 25th, 2024, NJR sold its 91MW residential solar portfolio to Spruce Power Holdings Corporation (SPRU) for \$132.5 million, which it used to pay down debt and for working capital.

New Jersey Resources reported second quarter 2026 results on May 4th, 2026, for the period ending March 31, 2026. Consolidated net financial earnings (NFE) amounted to \$222 million, compared to \$178 million in Q2 2025 and NFE per share of \$2.20 compared to \$1.78 per share one year ago.

Management increased its guidance for fiscal 2026 again, now seeing NFEPS in the range of \$3.48 to \$3.63. New Jersey Natural Gas (NJNG) is now expected to contribute 58 to 62 percent of NFEPS in FY 2026, while Clean Energy Ventures (CEV) will contribute 9 to 13 percent. Finally, a combination of Storage and Transportation, Energy Services, and Home Services and Other will make up 27 to 35 percent.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
NFEPS	\$1.60	\$1.73	\$2.74	\$1.96	\$2.07	\$2.16	\$2.50	\$2.70	\$2.95	\$3.29	\$3.56	\$4.76
DPS	\$0.96	\$1.02	\$1.09	\$1.17	\$1.27	\$1.32	\$1.48	\$1.56	\$1.68	\$1.80	\$1.90	\$2.42
Shares	86.7	87.1	88.3	89.6	95.1	96.2	96.2	98.2	100.0	101.0	102.0	108.0

New Jersey Resources measures its performance and its payout ratio using Net financial earnings (NFE) per share. NFE is implemented to eliminate the impact of volatility to GAAP earnings associated with unrealized gains or losses on derivative instruments. In fiscal 2021, the business adopted an accounting policy change around its solar projects. This set the foundation for further investments in solar. Management continues to project a 7% to 9% annual long-term earnings growth rate. With the sale of NJR's residential solar portfolio, CEV will now focus on commercial solar growth. It currently has approximately 513 MW commercial solar capacity.

We are projecting 6.0% annual earnings growth over the intermediate term, which would result in NFEPS of \$4.76 in 2031. NJR's capital plan includes \$4.8 billion to \$5.2 billion through 2030, an approximately 40% increase over the last five years, with 60% of this aimed towards utility investment.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	21.9	23.7	15.9	23.8	16.3	18.1	17.5	17.9	14.8	14.2	15.7	17.0
Avg. Yld.	2.7%	2.5%	2.5%	2.5%	3.8%	3.3%	3.2%	3.0%	3.8%	3.8%	3.4%	3.0%

The current P/E ratio based on forecasted 2026 NFEPS of \$3.56 is 15.7. Over the last ten and five years, NJR has averaged a P/E ratio of 18.4 and 16.5, respectively. We peg fair value at 17.0 times forecast NFEPS, implying a 1.6% valuation tailwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	60%	59%	40%	60%	61%	61%	59%	58%	57%	55%	53%	51%

The dividend payout ratio for the company on a net financial earnings basis appears to be very safe historically, especially for a utility company which can often safely pay out a large portion of earnings. We expect the company will continue to increase the dividend without a hitch. The company was not horribly affected by the Great Recession given the nature of its business as both earnings and the share price recuperated quickly. Through the COVID-19 pandemic, the company also remained solid. The company does not have a significant competitive advantage; however, its growing solar portfolio can set it apart from other natural gas players. Though the practice of integrating renewable assets in older energy companies has become common practice, NJR was at least ahead of the pack.

Final Thoughts & Recommendation

New Jersey Resources has paid a dividend since 1952 and has raised this dividend every year for the last thirty years. NJR has many growth initiatives in motion and a clear vision of its future, particularly for its natural gas and clean energy ventures. We are forecasting total annual returns of 10.4%, comprised of a 3.4% yield, 6.0% NFEPS growth, and 1.6% P/E multiple expansion. New Jersey Resources is trading at 93% of fair value, and with forecasted total annualized returns of 10.4%, we are maintaining the stock at a buy rating.
