Overview & Current Events

Plains All American Pipeline, L.P. is a midstream energy infrastructure provider. The company owns an extensive network of pipeline transportation, terminalling, storage, and gathering assets in key crude oil and natural gas liquids-producing basins at major market hubs in the United States and Canada. On average, it handles more than 9 million barrels per day of crude oil and NGL through 18,370 miles of active pipelines and gathering systems. Plains All American generates around \$40 billion in annual revenues and is based in Houston, Texas.

On May 8th, 2026, Plains All American posted its Q1 results for the period ending March 31st, 2026. Revenue for the quarter totaled \$12.5 billion, up roughly 9% compared to the prior year period. Adjusted EBITDA from crude oil rose 4% year-over-year to \$582 million, driven by contributions from recently completed bolt-on acquisitions, including the Cactus III pipeline acquisition, and higher pipeline volumes. These benefits were partially offset by certain Permian long-haul pipeline contract rate resets. Adjusted EBITDA from NGL decreased 23% year-over-year to \$145 million, primarily reflecting lower weighted average frac spreads and reduced sales volumes from warmer weather.

Total adjusted EBITDA attributable to PAA totaled \$730 million for the quarter, down 3% versus Q1 2025. Implied DCF per common unit came in at \$0.61, compared to \$0.66 in the prior year period. Management also raised the midpoint of full-year 2026 adjusted EBITDA guidance attributable to PAA by \$130 million to \$2.880 billion, reflecting a stronger oil macro environment and NGL contribution into May 2026, while the pending sale of substantially all of the Canadian NGL business to Keyera is expected to close in May 2026. We expect a DCFU of \$2.70 for the year.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
DCFU¹	\$1.82	\$1.82	\$2.46	\$2.99	\$2.31	\$2.05	\$2.26	\$2.46	\$2.49	\$2.61	\$2.70	\$3.45
DPS	\$2.50	\$1.70	\$1.20	\$1.44	\$0.90	\$0.72	\$0.92	\$1.12	\$1.33	\$1.56	\$1.67	\$2.94
Units²	464.0	717.0	726.0	727.0	728.0	716.0	701.0	699.0	702.0	704.0	706.0	670.0

Over the past decade, Plains All American Pipeline has experienced a rollercoaster ride when it comes to its DCFU, due to the volatile nature of the energy sector and its ability to navigate shifting market conditions. The oil market downturn hit hard in 2016 and 2017, slashing cash flow nearly in half to \$1.82. This period was a wake-up call for PAA, forcing the company to rethink capital allocation and focus on strengthening its balance sheet. By 2018 and 2019, the company had regained its footing, pushing DCFU back up to \$2.99 as production levels increased and pipeline demand grew. Then came 2020, and the COVID-19 pandemic delivered another major setback. With oil demand collapsing, DCFU fell to \$2.31, and the energy sector faced yet another round of uncertainty. However, PAA's disciplined approach to cost management and asset optimization helped the company weather the storm.

The years following the pandemic saw a steady recovery, with DCFU bouncing to \$2.26 in 2022 as volumes and margins improved, rising to \$2.49 in 2023 on stronger operating performance, holding flat at \$2.49 in 2024, and increasing further to \$2.61 in 2025 as earnings momentum continued.

¹ Distributable Cash Flow per Unit is a more meaningful metric compared to EPS for PAA's business model and capital structure.

² Unit count is in millions.

Plains All American Pipeline, L.P. (PAA)

Updated May 9th, 2026, by Nikolaos Sismanis

We now expect DCFU growth of 5% through 2031, powered by an improving outlook in the energy sector. We have also set our expected distribution growth rate at 12% over the medium-term. Unit buybacks should also contribute to results during this period.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/DCF	14.8	14.3	9.8	7.7	5.6	5.0	4.7	5.0	6.7	7.1	8.0	8.0
Avg. Yld.	9.3%	6.5%	5.0%	6.3%	5.5%	7.0%	8.4%	9.0%	8.0%	8.4%	7.7%	10.7%

Plains All American's valuation multiple has, on average, hovered just over 8x its distributable cash flows over the past decade. During the tumultuous period of the COVID-19 pandemic, the stock's valuation experienced a notable multiple compression. This theme lasted until last year. Encouragingly, shares have been gradually converging to a more reasonable level, and today, we believe the stock is fairly valued. The distribution yield of 7.7% is significant, and we expect it to advance further higher following continuous distribution hikes.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	137%	93%	49%	48%	39%	35%	41%	46%	54%	60%	62%	85%

PAA's payout ratio is currently sitting at relatively comfortable levels. Following last year's distribution cut and clear capital allocation strategy, we don't expect another one going forward, especially considering management's intention to grow the annual distribution rate per unit. That being said, we cannot restfully trust its resiliency either. The company enjoys some qualities and competitive strengths, including a geographically diverse and interconnected asset base that provides operational flexibility, a high-quality customer base that supports sustainable fee-based cash flow generation (Marathon Petroleum, Phillips 66, etc.), and a highly experienced management team. Still, the company is highly susceptible to a potential recession and the overall volatile profile of the energy sector, which could materially affect its performance and financials, as has been the case several times.

Final Thoughts & Recommendation

In recent years, Plains All American has registered excellent returns. Nevertheless, we project further gains ahead. Based on our growth projections and the 7.7% yield, we see an annual return potential of 12.7% over the medium-term. We rate the stock as a hold, though, due to the not-so-long dividend growth track record.
