Overview & Current Events

Ross Stores operates 1,917 stores with off-price apparel and home fashion in 44 states. It also operates 365 dd's DISCOUNTS stores in 22 states and has a market cap of \$74 billion. The retailer offers attractive merchandise at a 20%-60% discount compared to the regular prices of department and specialty stores. Prior to 2020, Ross Stores had grown its revenue and its earnings-per-share every single year for more than a decade. This record is a testament to the strength of its business model and the quality of its management, which executes its growth plan in an exemplary way. In late May, Ross Stores reported (5/21/26) results for the first quarter of fiscal 2026. Sales and comparable sales grew 21% and 17%, respectively, over last year's quarter and earnings-per-share surged 37%, from \$1.47 to \$2.02, thanks to accelerated business momentum. The company beat the analysts' estimates by \$0.29 and thus it has now exceeded the analysts' estimates in 20 of the last 21 quarters. The retailer posted strong results despite the headwind of tariffs. Very few clothes are directly imported but more than half of merchandize has been produced in China. Thanks to accelerated momentum, management raised its guidance for earnings-per-share in 2026 from \$7.02-\$7.36 to \$7.50-\$7.74. Given the exceptional record of Ross Stores in beating estimates and the tendency of management to issue cautious guidance, we have raised our forecast for annual earnings-per-share from \$7.25 to \$7.70. We still view the headwinds from cost inflation and tariffs as temporary and remain confident in the bright long-term outlook of Ross Stores.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.83	\$3.55	\$4.26	\$4.60	\$0.78	\$4.87	\$4.38	\$5.56	\$6.32	\$6.61	\$7.70	\$12.40
DPS	\$0.54	\$0.64	\$0.90	\$1.02	\$0.29	\$1.14	\$1.24	\$1.34	\$1.47	\$1.62	\$1.78	\$2.74
Shares¹	391.9	379.7	368.4	356.9	355.2	351.2	342.0	335.0	329.0	322.0	315.0	305.0

Ross Stores has grown its earnings-per-share more than 7-fold since 2009, from \$0.89 to \$6.61 in 2025. Moreover, it still has growth prospects ahead. The company currently has 2,282 stores while management is confident for a potential of 3,600 stores in the U.S. It has raised this number, from 2,900 previously, thanks to the large number of retail bankruptcies caused by the pandemic. As a result, the company can still grow its store count meaningfully. As the retailer normally opens about 100 new stores per year, it is evident that it has about a decade of growth ahead.

Ross Stores has missed the analysts' estimates only four times in the last 49 quarters. Moreover, it has grown its earnings-per-share by 9.9% per year on average over the last decade. We expect 10.0% average annual growth of earnings-per-share over the next five years.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031

Ross Stores (ROST)

Updated May 22nd, 2026 by Aristofanis Papadatos

Ross Stores has surged 42% in the last 12 months thanks to strong business performance and thus it is currently trading at a price-to-earnings ratio of 29.7, which is much higher than its 10-year average price-to-earnings ratio of 18.8. If the stock trades at its historical valuation level in five years, it will incur an -8.8% annualized valuation drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	19.1%	19.2%	21.1%	22.2%	37.2%	23.4%	28.3%	24.1%	23.3%	24.5%	23.1%	22.1%

The key behind the exceptional growth record of Ross Stores is the fact that it offers great discounts on popular brands. It creates a treasure-hunting experience, which is appealing to consumers and constitutes a moat. This unique shopping experience helps explain why Ross Stores is one of the few retailers that have not been affected by Amazon. Moreover, while the U.S. economy has been growing for more than a decade, consumers have become increasingly price-conscious in recent years. Therefore, Ross Stores appeals to a wide range of consumers. With that said, competition has become increasingly heated in the retail sector.

Ross Stores had raised its dividend for 25 consecutive years until 2020. Its capital expenses have remained below half of its operating cash flows every year in the last decade, resulting in high free cash flows. However, the retailer was forced to suspend its dividend in 2020 due to the pandemic. Ross Stores proved resilient in previous recessions, as consumers were particularly price-sensitive. However, this downturn was much fiercer, as it forced the company to close its stores for nearly two months and social distancing was a strong headwind for this business. Nevertheless, the retailer has fully recovered from the pandemic, with record earnings-per-share in each of the last three years.

Final Thoughts & Recommendation

Ross Stores is a high-quality discount retailer with a wide moat and solid growth prospects over the next several years. With that said, the stock has surged 42% in the last 12 months thanks to strong business performance and hence it has become less attractive. It could offer a 1.3% average annual return over the next five years, as 10.0% growth of earnings-per-share and a 0.8% dividend may be partly offset by an -8.8% valuation headwind. The stock maintains its hold rating.
