Overview & Current Events

Skyworks Solutions is a semiconductor company that designs, develops, and markets proprietary semiconductor products worldwide. Its products include antenna tuners, amplifiers, converters, modulators, receivers, and switches. Skyworks' products are used in diverse industries, including automotive, connected home, industrial, medical, smartphones, and defense. The company traces its roots back to a merger in 2002, is headquartered in Woburn, Massachusetts, employs over 8,400 people, and has a market capitalization of \$10.7 billion.

On May 5th, 2026, Skyworks reported second-quarter results for fiscal year 2026. The company reported second-quarter fiscal 2026 revenue of \$944 million, down 1% year-over-year but exceeding estimates. GAAP operating income was \$42 million with diluted EPS of \$0.24. Non-GAAP operating income reached \$189 million with diluted EPS of \$1.15, beating estimates by \$0.11. The company secured a significant multi-generational design win with a leading Android OEM, expected to generate over \$1 billion in revenue through 2030. CEO Phil Brace highlighted strong execution, with Broad Markets delivering double-digit year-over-year growth driven by Wi-Fi, data center, and automotive demand, while Mobile performed ahead of expectations.

Broad Markets momentum was supported by Wi-Fi 7 platforms with key OEMs, in-vehicle infotainment wins with BYD and a major German Tier-1 supplier and expanded timing solutions for data centers and PCIe Gen 7 applications. The company also advanced its 6G leadership with the introduction of a new FR3 RF front-end power amplifier. Skyworks maintained disciplined cost management and operational focus amid a dynamic environment.

For the third fiscal quarter, Skyworks expects revenue of \$900 million to \$950 million and non-GAAP diluted EPS of approximately \$1.03 at the midpoint. The company declared a quarterly dividend of \$0.71 per share, payable on June 16, 2026. Management expressed confidence in its diversified portfolio, innovation pipeline, and ability to capitalize on secular growth opportunities in mobile and broad markets.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$5.57	\$6.45	\$7.22	\$6.17	\$6.13	\$10.50	\$11.24	\$8.52	\$6.27	\$5.93	\$5.01	\$6.39
DPS	\$1.06	\$1.16	\$1.34	\$1.58	\$1.88	\$2.24	\$2.30	\$2.54	\$2.74	\$2.81	\$2.84	\$3.98
Shares¹	192.0	186.0	183.0	175.0	169.0	167.0	163.0	160.3	161.5	161.5	162.0	163.0

Skyworks has grown over the past decade thanks to the proliferation of smartphones that use its chips. The company increased its EPS by 0.7% per year over the past ten years and -13.8% over the past five years. These past years of 2020 and 2021 saw a significant upturn for many semiconductor companies, including Skyworks, but analysts, on average, expect 4% earnings growth over the next three years. However, our base case is for ~5% growth over the next five years. The company has been increasing its dividend since 2014, where the five-year average dividend growth rate is 4.9%, and it has a payout ratio of 57% based on this year's expected earnings of \$5.01 a share.

¹ Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	12.9	14.3	9.6	19.6	23.5	15.7	7.6	11.6	15.7	13.0	14.0	13.0
Avg. Yld.	1.4%	1.1%	1.5%	2.0%	1.3%	1.3%	2.7%	2.6%	2.8%	3.7%	4.3%	4.8%

Skyworks has averaged a 14.3x P/E ratio over the past ten years. We consider a P/E ratio of approximately 13.0x to be fair. At least until the company can demonstrate a broader customer base and diversify away from its smartphone focus. However, the stock is overvalued to our fair price. The current dividend yield is higher than its five-year average.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	19%	18%	19%	26%	31%	21%	20%	30%	44%	47%	57%	62%

Skyworks's advanced products give it a small economic moat in the niche of wireless technology, but the company is heavily reliant on the smartphone market, particularly on Apple. Over the past three years, Skyworks has generated 39%-51% of its annual revenue from Apple. This has been a tremendously profitable Skyworks relationship during the proliferation of iPhones and other smartphones over the past decade. Still, as iPhones and other smartphones become saturated in the marketplace, Skyworks is increasingly looking to diversify into other markets. The company is expected to benefit from the 5G cellphone technology shift with more revenue earned per phone. Still, it seeks to strengthen its foothold in automobile connectivity, smart homes, and other internet of things end markets to diversify its customer base outside of the phone market. Thus far, the company has generated very high returns on invested capital, often over 20% per year. The dividend is new but very well covered by earnings, and we consider it very safe. The company remained profitable during the previous recession.

Final Thoughts & Recommendation

Skyworks is a specialized semiconductor company that has generated desirable growth rates and capital returns during the past decade. The company's earnings growth will likely be less stellar in the future because its crucial growth driver in recent years, the smartphone market, has matured. Skyworks' key opportunity and challenge will be diversifying into other industries and broadening its customer base while maintaining a solid presence in the phone market. However, we expect 7.7% forward returns for the next five years. We give SWKS a hold recommendation.
