Overview & Current Events

Badger Meter was founded in 1905 in Milwaukee, WI. The company's first product was a "frost proof" water meter. Today, Badger Meter manufactures and markets meters and valves that are used to measure and control the flow of liquids, such as water, oil and various chemicals. The company's products are also used to control the flow of air and other gases. Badger Meter generates ~\$917 million in annual revenues. The company is also a founding member of the American Water Works Association, a trade group that sets water measurement standards in the U.S.

On August 8th, 2025, Badger Meter increased its quarterly dividend 17.6% to \$0.40 per share for the September 5th payment date, extending the company's dividend growth streak to 33 consecutive years.

On July 22nd, 2026, Badger Meter released second quarter earnings results for the period ending June 30th, 2026. For the quarter, revenue declined 6.6% to \$222.3 million, which was \$1.2 million below estimates. Earnings-per-share of \$1.02 compared unfavorably to earnings-per-share of \$1.17 in the prior year, but topped expectations by \$0.01.

Revenue results were higher by 10% on a sequential basis, but utility water sales were once again down year-over-year, this time by 8%. Uneven growth in certain parts of the business was largely responsible for the sales decline and were offset by strong demand for SaaS and other BlueEdge products. Revenue for flow instrumentation products grew 6% year-over-year due to growth in water-related markets. Gross margins contracted 30 basis points to 40.8% while the operating margin fell 110 basis points to 17.7%. Shares closed lower by more than \$19, or 13.2%, following the earnings release.

We now forecast that Badger Meter will earn \$4.52 per share in 2026, down from \$5.13 and \$5.16 previously. This would represent a 5.6% decrease from the prior year. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.11	\$1.19	\$1.54	\$1.61	\$1.69	\$2.08	\$2.26	\$3.14	\$4.23	\$4.79	\$4.52	\$9.09
DPS	\$0.43	\$0.49	\$0.56	\$0.68	\$0.72	\$0.76	\$0.85	\$0.99	\$1.22	\$1.48	\$1.60	\$3.22
Shares³	29	29	29	29	29	29	29	29	29	29	29	29

Badger Meter has increased earnings per share by 17.6% per year over the past decade and 16.8% over the last five years. The company's business was resilient in the face of the pandemic in 2020, showing Badger Meter's underlying strength. We reaffirm our projected earnings growth rate of 15% as this is more in-line with the long-term growth rate and to also account for the quality of earnings results, Badger Meter has also impressively improved its margins. Furthermore, we expect that dividend growth will mirror earnings growth.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	30.6	34.8	31.8	34.9	39.1	51.2	48.2	49.2	50.1	36.4	28.1	35.0
Avg. Yld.	1.3%	1.2%	1.1%	1.1%	1.1%	0.7%	0.8%	0.6%	0.6%	0.8%	1.3%	1.0%

Shares of Badger Meter have gained \$11, or 9.5%, since our April 20th, 2026 update. The stock has an average price-to-earnings ratio of 40.6 over the last decade and 47.0 over the last five years. We reaffirm our target P/E ratio of 35.0 as this is more in-line with the stock's long-term average valuation. The stock has a current P/E ratio of 28.1 times expected earnings, meaning that shareholders could very likely see tailwinds from valuation expansion in the coming years. Reverting to our target valuation by 2031 would add 4.5% to annual returns over this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	39%	41%	36%	42%	43%	37%	38%	32%	29%	31%	35%	35%

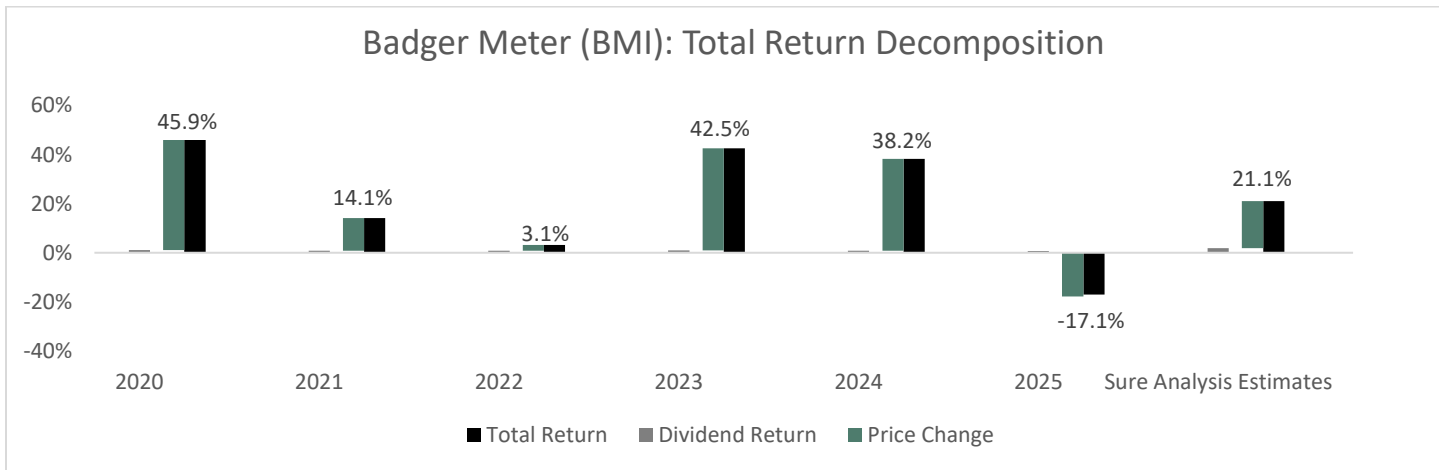

Given Badger Meter's 33-year dividend increase streak and reasonable payout ratio, the dividend is likely very safe today. We also see plenty of room for growth in the payout, so Badger Meter is certainly attractive from a dividend growth perspective.

Unlike many companies at the height of the last recession, earnings-per-share for Badger Meter improved. Most of the company's sales are made to municipal water utilities. A key competitive advantage that Badger Meter possess is that consumers require access to water, regardless of economic conditions. In addition, it is estimated that there are more than 30 million water meters in the U.S. that are not monitored with the advanced equipment that Badger Meter offers. And with some states, like California, looking to improve its water monitoring systems for use in times of droughts, the company is in a prime position to benefit from upgrades and improvements.

Final Thoughts & Recommendation

Following second quarter earnings results, Badger Meter is projected to return 21.1% annually through 2031, up from our prior estimate of 26.4%. This projected return stems from a 15% earnings growth rate, a starting yield of 1.3%, and a mid-single-digit contribution from multiple expansion. As with Q1, Badger Meter's Q2 showed weakness in its important business. Long-term, we continue to like the company's growth story. We have lowered our five-year price target \$43 to \$318 due to earnings estimates for the year. Shares trade well below our fair value target after the recent selloff. We continue to view shares of Badger Meter as a buy due to projected returns and a strong dividend risk score.
