Morgan Stanley is a financial holding company that provides various financial products and services to corporations, governments, financial institutions, and individuals worldwide. The company operates through Institutional Securities, Wealth Management, and Investment Management segments, including offering capital raising and financial advisory services, underwriting of debt, equity, and other securities, as well as advice on mergers and acquisitions. Morgan Stanley is headquartered in New York, New York.

On July 15th, 2026, Morgan Stanley posted its Q2 results for the period ending June 30th, 2026. The company delivered record quarterly net revenues of \$21.35 billion, up from \$16.79 billion in the prior-year period, with strong performance across its major businesses. Investment Banking revenues grew 58% year over year, supported by higher completed M&A transactions, particularly in the Americas, and stronger equity and fixed income underwriting activity. The Equities division performed exceptionally well, with net revenues surging 69% to a record \$6.30 billion on broad strength across businesses and regions, particularly in Asia. Fixed Income net revenues increased 13%, mainly due to stronger credit results and continued lending growth in securitized products.

Earnings-per-share for the quarter came in at \$3.46, up from \$2.13 in the prior-year period. Morgan Stanley repurchased \$1.5 billion of stock during Q2, while period-end shares outstanding declined roughly 2% year over year. The board also authorized a new share-repurchase program of up to \$20 billion and raised the quarterly dividend by 15% to \$1.15 per share. We now expect EPS of \$13.00 for this year.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.98	\$3.14	\$4.81	\$5.26	\$6.46	\$8.03	\$6.15	\$5.18	\$7.95	\$10.21	\$13.00	\$20.00
DPS	\$0.75	\$0.95	\$1.15	\$1.35	\$1.40	\$2.10	\$2.95	\$3.25	\$3.55	\$3.85	\$4.60	\$7.08
Shares¹	1887	1821	1738	1640	1624	1814	1713	1646	1611	1592	1569	1500

Coming out of the Great Financials Crisis, Morgan Stanley's profitability surged. Earnings growth lagged in 2022 and 2023. This was due a tough macroeconomic landscape that persisted at the time. Interest rates continue to remain high to this date. However, with inflation easing and rates likely to see cuts this year, financial deal making has already risen, driving EPS growth for the company this year.

In general, though, Morgan Stanley earnings continue to benefit from the acquisitions of E-Trade and Eaton Vance that took place back in 2021. The company's cash flow is now more stable, thanks to a shift in its revenue stream. Instead of relying on interest rates and market activity, the acquisitions allowed Morgan Stanley to generate steady management fees from E-Trade and Eaton Vance's recurring customer charges. Additionally, the focus on buybacks has contributed to the boost in EPS and shareholder value creation, with the company retiring about 16% of its shares since 2016, despite a 14% increase in share count to fund the acquisitions.

Morgan Stanley's board has also approved significant dividend increases in recent years. A 100% increase took place in 2021 and subsequent hikes of 10.7%, 9.7%, 8.8%, 8.1%, and re-acceleration of 15.0% in 2022, 2023, 2024, 2025, and 2026, along with strong buybacks, showcases their intent for maintaining robust shareholder returns.

¹ Share count is in millions.

Morgan Stanley (MS)

Updated July 17th, 2026, by Nikolaos Sismanis

Backed by favorable growth catalysts, including ongoing buybacks, improving conditions in the capital markets, as well as various efficiencies AI is bringing in the world of finance, we forecast 9% growth in both EPS and DPS through 2031.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	11.3	15.9	9.7	8.5	12.0	11.2	13.8	16.2	12.1	13.7	16.8	16.0
Avg. Yld.	2.2%	1.9%	2.5%	3.0%	2.4%	1.8%	3.5%	3.9%	3.7%	2.8%	2.1%	2.2%

Morgan Stanley’s valuation has hovered at quite reasonable levels throughout the decade. The stock is now trading at 16.8 times our expected FY2026 earnings. While this is above the stock’s historical average, we believe AI-driven growth in financials can lead to a re-rating. Thus, we have set our fair multiple at 16x, although this still implies a soft valuation headwind. The 2.1% yield is below its decade-average, but this is likely due to investors expecting above-average EPS and DPS growth in the coming years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	25%	30%	24%	26%	22%	26%	48%	63%	45%	38%	35%	35%

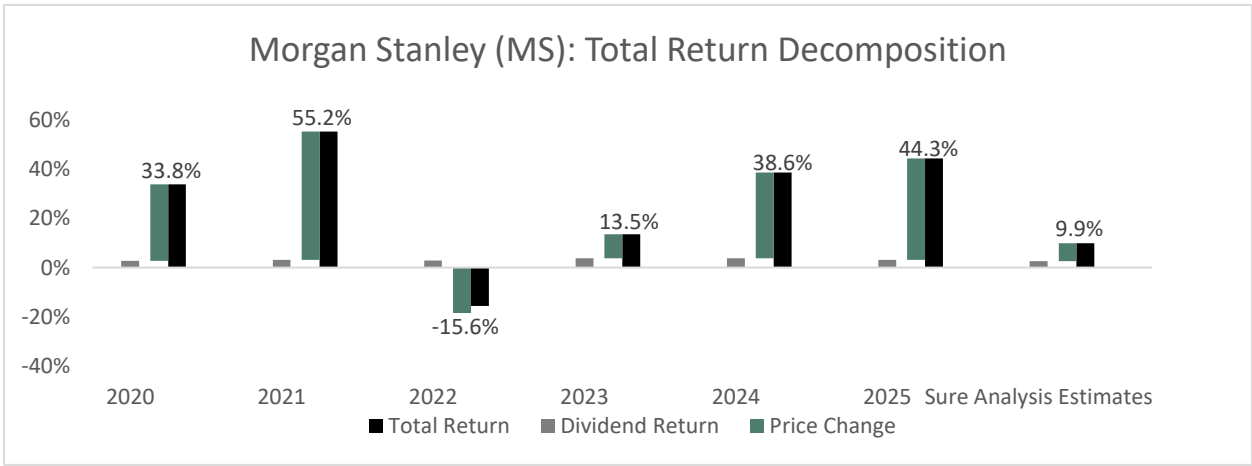

Morgan Stanley’s current dividend should be quite safe. The company was previously forced to cut its dividend during the Great Financial Crisis. However, as its revenues have been transitioning continuously to the asset management side, we believe that the bank’s performance should be able to come out solid in a potential future recession. Its resiliency was demonstrated during the pandemic, when it produced strong financial results and executed major acquisitions with confidence.

In addition, Morgan Stanley’s competitive advantage is rooted in its scale and influence. As the second-largest wealth management firm in the U.S., behind only Bank of America, Morgan Stanley enjoys a rather extensive client base and the associated benefits of size, such as economies of scale and extensive resources to attract and retain clients. That said, Interest rates remaining elevated and the fact that Morgan Stanley operates in a massively competitive industry with consistently declining expense rates (e.g., near-zero fee ETFs) are two risks to keep in mind.

Final Thoughts & Recommendation

Morgan Stanley’s results continue to benefit from an increasingly favorable capital markets landscape. We now forecast annualized returns of 9.9% from the stock through 2031, stemming from our estimated growth and the 2.1% yield, offset by the possibility of a valuation headwind. We rate MS as a hold.
