Overview & Current Events

Founded in 2005, ServisFirst Bancshares, Inc. is a regional bank. SFBS operates as the holding company of ServisFirst Bank. As of Jun. 30, 2026, the company had 35 office locations scattered throughout Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee, Texas, and Virginia. The market share in its markets ranged from the low single digits to as much as 20%+ in Alabama, where it has its corporate HQ. Concluding Q2 2026, the company had over \$18.3 billion in assets.

SFBS's product offerings are what somebody would expect from a bank. Savings products include savings accounts, checking accounts, and money market accounts. SFBS's loan products are residential real estate loans, vehicle loans, personal loans, commercial lines of credit, commercial real estate loans, and construction and development loans. The company also provides customers with telephone and mobile banking, internet banking, safe deposit boxes, and debit and credit cards. Last July, SFBS earned the distinction of being the fifth-ranked publicly traded bank in the nation with between \$10 billion and \$50 billion in assets, according to American Banker. Metrics like three-year average returns on average equity, return on average assets, net interest margin, and other measures are used to arrive at these rankings.

On Jul. 20, SFBS released its earnings report for the second quarter ended Jun. 30, 2026. The company's net interest income after provisions for credit losses surged 19.8% over the year-ago period to \$144.2 million during the quarter. SFBS's net interest margin expanded by 53 basis points year-over-year to 3.63% in the quarter. The company's adjusted non-interest income spiked 43.5% higher over the year-ago period to \$12.5 million for the quarter. SFBS's diluted EPS vaulted 40.2% higher year-over-year to \$1.57 during the quarter, which matched the analyst consensus. Also of note, the company announced a two-for-one common stock split in the form of a stock dividend. This will be payable on Aug. 20 to shareholders of record as of Aug. 5.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.52	\$1.72	\$2.53	\$2.76	\$3.13	\$3.82	\$4.61	\$3.79	\$4.16	\$5.06	\$6.45	\$10.39
DPS	\$0.15	\$0.19	\$0.38	\$0.60	\$0.70	\$0.80	\$0.92	\$1.12	\$1.20	\$1.34	\$1.52	\$2.45
Shares²	52.6	53.0	53.4	53.6	53.9	54.2	54.3	54.5	54.6	54.6	54.7	55.0

Over the last decade, SFBS has compounded its diluted EPS at a firmly double-digit annual rate. As the bank grows, this level of growth will likely become less sustainable over time. SFBS plans to keep focusing on opening new locations in metropolitan, Southern markets in the years to come. Along with organic loan growth and incremental net interest margin expansion, we continue to think that EPS can compound by 10.0% annually over the medium term, off a 2026 base of \$6.45.

¹Estimated based on past dividend dates.

²Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	24.6	23.3	12.7	13.6	12.9	22.0	15.0	16.9	20.3	14.2	13.6	16.0
Avg. Yld.	0.4%	0.5%	1.2%	1.6%	1.8%	0.9%	1.3%	1.7%	1.4%	1.9%	1.7%	1.5%

Since 2016, SFBS's P/E ratio has varied from as low as the low double-digits to as high as the mid-20s. Over that time, the P/E ratio has averaged 17.6. Accounting for SFBS's larger scale, we think a rational fair value multiple will be around 16, which would be a standard deviation below the five-year and 10-year averages. After the 13% rally in recent months, the current-year P/E ratio has risen to 13.6. That still implies shares are trading at a double-digit percentage discount to our fair value estimate.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	10%	11%	15%	22%	22%	21%	20%	30%	29%	26%	24%	24%

SFBS enjoys a few notable operating advantages. These include the simplicity of its business model in that loans and deposits are primary drivers of its growth, not ancillary services. Additionally, the company's technology-oriented business model means that its branch footprint is limited. This allows for greater efficiency versus many of its peers. Lastly, SFBS offers the products that big banks do with the delivery that would be expected from a community bank. That has led to profitability in each quarter since 2005 and rather reliable growth in diluted EPS over time. SFBS's nonperforming assets to total assets ratio was still decent at 0.96% (a four-basis point improvement sequentially). Coupled with a payout ratio that's poised to remain in the mid-20% range in 2026, that positions the dividend to grow as fast as earnings in the future. This should translate into at least 10% annual dividend growth over the next several years.

Final Thoughts & Recommendation

SFBS's 1.7% dividend yield, 10.0% annual diluted EPS growth potential, and 3.4% annual valuation multiple expansion potential could lead to 15.1% annual total returns through 2031. As a result, we're reiterating our Buy rating.

Total Return Breakdown by Year
