Overview & Current Events

Grupo Aval Acciones y Valores S.A. is a Colombian financial holding company. It is the parent institution of four different Colombian banks which, in aggregate, are the largest banking entity in the country as measured by deposits and gross loans. Grupo Aval's subsidiaries also control businesses across verticals including pensions and asset management, payments, government finance, investment banking, and insurance. In addition, Aval has partial ownership of a subsidiary which owns hard assets in Colombia including toll roads, energy and gas, agribusiness, and hotels.

Grupo Aval has been publicly traded in Colombia for more than 30 years, and it debuted its shares in New York with an IPO in 2014. Each U.S. ADR share represents 20 shares of the local Colombian equity. In 2022, Grupo Aval spun off its Central American banking business, which had represented about a third of its total assets prior to that transaction. The bank paid out a special dividend of \$1.47 per share to U.S. holders of AVAL stock as compensation in lieu of delivering shares of the new bank to non-Colombian investors. We do not count that dividend in the firm's usual DPS since that acted more like a return of capital in practice.

The company reported its Q2 results on August 12th, 2026. The company's EPS of 16 cents rose from the 10 cents reported in the same period of the prior year. Net income rose 17% y-o-y as measured in Colombian Pesos. The EPS surge was driven by a 21% increase in profits from the infrastructure segment, higher net interest margin, lower expenses, and sharp appreciation of the Colombian peso as compared to the dollar. This quarter was far better than Q1, with profits rising more than 50% on a sequential basis. Colombia elected a conservative pro-business president in June 2026, ending the country's prior socialist administration. This has led to a sharp uptick in investment activity and improved sentiment for Colombian assets. We have raised our 2026 EPS estimate accordingly.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$0.63	\$0.58	\$0.81	\$0.78	\$0.59	\$0.75	\$0.45	\$0.16	\$0.19	\$0.37	\$0.55	\$0.85
DPS	\$0.38	\$0.33	\$0.29	\$0.34	\$0.34	\$0.28	\$0.28	\$0.18	\$0.13	\$0.14	\$0.19	\$0.25
Shares	1114	1114	1114	1114	1114	1114	1157	1187	1187	1187	1187	1187

The nation of Colombia derives about half its export income from crude oil. As such, Aval's earnings are significantly tied to oil prices and the bank had been in a downward trend operationally since 2014 when oil prices rolled over. The election of a socialist government in 2022 further weakened the Colombian economy. However, Aval's earnings are bouncing back from a trough now, and we see significant room for recovery. Do note, though, that Aval spun off a large subsidiary in 2022, so it will be harder to regain its peak levels of profitability with today's smaller asset base.

Aval grew its dividend every year between 2001 and 2015 (as measured in Colombian pesos). However, the crash in oil prices led to a dividend cut in 2016. Aval pays a monthly dividend, and it most recently increased its dividend in March 2026. The dividend is set at 2.65 pesos per month per share, a 15% increase from last year's dividend level. In U.S. dollar terms, the dividend works out to approximately \$0.016 per share per month, which amounts to about \$0.19 annually.

¹ As measured in Colombian pesos.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	12.7	14.5	7.3	11.2	11.6	6.8	5.7	15.6	10.5	8.8	9.7	10.0
Avg. Yld.	4.9%	4.7%	5.7%	4.0%	5.9%	5.3%	6.0%	3.6%	7.9%	4.3%	3.6%	3.0%

Grupo Aval has averaged a roughly 10x P/E ratio over both the past five and ten years, respectively. That should continue to be a fair valuation for the stock going forward. Aval could earn a higher P/E ratio in the future if Colombia regains more prestige internationally, but, for now, it faces lingering structural challenges and political concerns. The bank is currently yielding 3.6%. We expect the yield to remain below prior levels as Aval seeks to reinvest in its business as local economic conditions improve.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	60%	57%	36%	44%	58%	37%	62%	113%	68%	38%	35%	30%

Aval had a 14-year dividend growth streak running up through 2015. Management is conservative, and a Colombian billionaire retains ownership of more than 80% of the bank's equity. This family leadership has proven to be good stewards of capital and run the bank prudently. Aval remained profitable and increased its dividend during the 2008 recession. However, Aval is not immune to economic shocks, and it is particularly exposed to oil price volatility. Aval's ownership of hard assets in Colombia makes it more cyclical than some other local financial institutions. We believe the current dividend is sustainable and there is room for dividend growth going forward.

Final Thoughts & Recommendation

Group Aval has faced a perfect storm of economic and political troubles around it in recent years, including an earthquake in Western Colombia in August 2026 which killed at least 250 people, and which could lead to higher loan loss reserves in H2 2026. However, the core banking units remain highly profitable and have managed risk well. As Colombia comes out of this downturn and returns to robust economic growth, AVAL shares should lead the charge higher for Colombian equities. The bank's current 3.6% yield is high enough to make it an interesting monthly dividend-paying option. The bank has a total return outlook of 12.4% annualized thanks to the dividend, reasonable growth prospects, and a touch of multiple expansion. However, limited dividend growth history leaves the stock at a hold rating.
