Overview & Current Events

Brookfield Renewable Partners L.P. operates one of the world's largest portfolios of publicly traded renewable power assets. Its portfolio consists of about 46,000 megawatts of capacity in North America, South America, Europe, and Asia. Brookfield Renewable Partners is one of four publicly traded listed partnerships that are operated by Brookfield Asset Management (BAM). The others are Brookfield Infrastructure Partners (BIP) and Brookfield Business Partners (BBU). Brookfield Renewable Partners trades with a market capitalization of US\$23 billion and is cross listed on the New York Stock Exchange and the Toronto Stock Exchange, where it trades under the tickers 'BEP' and 'BEP.UN', respectively. Despite operating as a Canadian company, Brookfield Energy Partners reports financial results in U.S. dollars. All figures in this report refer to its NYSE stock listing and are denominated in U.S. dollars. On December 11th, 2020, Brookfield Renewable Partners implemented a 3-for-2 stock split.

In late July, BEP reported (7/31/26) results for the second quarter of 2026. Its funds from operations (FFO) per unit grew 11%, from \$0.56 to \$0.62, thanks to asset development and acquisitions. Management expects the strong business momentum to remain in place this year. We still expect 9% growth of FFO per share this year. BEP is resilient to high inflation, as about 70% of its contracts are indexed to inflation and most of its costs are fixed. However, due to hefty investments, which have caused interest expense to exceed operating income by a wide margin, BEP is vulnerable to an environment of high interest rates. Fortunately for BEP, the Fed cut interest rates in the second half of last year.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
FFOPS¹	\$0.97	\$1.27	\$1.44	\$1.24	\$1.52	\$1.45	\$1.56	\$1.67	\$1.83	\$2.01	\$2.20	\$2.94
DPS	\$0.95	\$1.00	\$1.31	\$1.03	\$1.30	\$1.22	\$1.28	\$1.35	\$1.42	\$1.49	\$1.57	\$1.86
Shares²	288.7	311.8	312.2	311.3	473.3	473.5	473.8	486.9	663.0	662.0	670.0	800.0

We expect BEP to keep growing its FFO meaningfully via its heavy investing in new projects and the steadily decreasing production cost of solar and wind power. The company invested an almost record \$1.9 billion in all major decarbonization assets in 2025 and it is one of the largest publicly traded renewable power platforms. The objective of BEP as a publicly traded partnership is *"to deliver long-term annualized total returns of 12%-15%, including annual distribution increases of 5%-9% from organic cash flow growth and project development."* While the total return portion is based on the market price of the security, the distribution and business growth are under the company's control. We believe Brookfield Renewable Partners investors can expect organic growth of around 6% over the intermediate term.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/FFO	20.5	18.4	14.1	14.6	21.9	27.5	22.0	16.4	13.7	12.5	15.5	16.0
Avg. Yld.	6.0%	5.4%	6.4%	5.7%	3.9%	3.1%	3.7%	4.9%	5.7%	5.9%	4.6%	3.9%

Brookfield Renewable Partners (BEP)

Updated August 12th, 2026 by Aristofanis Papadatos

Brookfield Renewable Partners is currently trading at a price-to-FFO ratio of 15.5. The stock has traded at an average price-to-FFO multiple of 18.2 over the last decade but we assume a fair earnings multiple of 16.0 due to the high debt load of BEP. If the stock trades at its fair valuation level in five years, it will enjoy a 0.7% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout ³	123%	98.4%	90.7%	84.1%	85.5%	84.1%	82.1%	80.8%	77.6%	74.1%	71.4%	63.0%

Brookfield Renewable Partners does not cover its interest expense, as the latter is currently more than double the operating income. On the other hand, the company has a marginal investment-grade rating of BBB+.

Moreover, the company benefits from Brookfield's various competitive advantages, which include a global operating presence, a long and successful track record of operating real assets, and a skilled management team. The company has agreed to provide over 10.5 GW of renewable energy to Microsoft to enable the growth of its AI business. It is also critical to note that hydroelectric energy generates more than half of the total funds from operations of the company. BEP has one of the largest hydroelectric businesses in the world, which has more than doubled in size in the last eight years. Hydroelectric assets benefit from long useful lives (often over 100 years) and low operating and capital costs.

Final Thoughts & Recommendation

Brookfield Renewable Partners is one of the largest and most successful pure-play investment vehicles in the world of renewable energy. Due to its high debt load, the company is hurt by high interest rates, which increase the interest expense and reduce the present value of future earnings, thus exerting pressure on valuation. Fortunately, the Fed cut interest rates in late 2025 and may cut them further if inflation subsides. We view the stock as attractive from a long-term perspective. The stock has rallied 41% in the last 2 years but it could still offer a 10.4% average annual return over the next five years thanks to 6.0% growth of earnings-per-share, its 4.6% dividend and a 0.7% valuation tailwind. It receives a hold rating.
