Overview & Current Events

Clorox is a manufacturer and marketer of consumer and professional products, spanning a wide array of categories from charcoal to cleaning supplies to salad dressing. The company was founded in 1913 and trades with a market capitalization of \$13 billion. More than 80% of its revenue comes from products that are #1 or #2 in their categories across the globe, helping Clorox produce nearly \$7 billion in annual revenue. The company also boasts an outstanding dividend increase streak of 49 consecutive years.

Clorox posted fourth quarter and full-year earnings on August 3rd, 2026, and results were better than expected on both revenue and profits. Adjusted earnings-per-share came to \$1.66, which was a penny ahead of estimates. Revenue was down 2.5% year-on-year to \$1.95 billion, but did beat estimates by \$40 million. The GOJO acquisition added about 10 points of growth. Organic sales plummeted 13% year-over-year, primarily due to lapping the incremental shipments related to the ERP transition, which was 13.5% of the decline, implying adjusted organic sales would have been fractionally higher.

Gross margin was off 520 basis points to 41.3% of revenue, primarily driven by lower volume, impact from inventory related to GOJO, higher commodity costs, and higher manufacturing and logistics costs. These were partially offset by cost savings.

We start 2027 with an estimate of \$5.80 in adjusted earnings-per-share, which would mark modest growth from 2026, but still well off of levels from 2024/2025.

Clorox raised its dividend for the 49th consecutive year, adding 0.8% from prior.

Growth on a Per-Share Basis

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2032
EPS	\$5.33	\$6.26	\$6.32	\$7.36	\$7.25	\$4.10	\$5.78	\$6.17	\$7.72	\$5.53	\$5.80	\$8.13
DPS	\$3.24	\$3.36	\$3.84	\$4.24	\$4.44	\$4.64	\$4.74	\$4.80	\$4.88	\$4.96	\$5.00	\$5.80
Shares¹	129	128	128	128	127	123	124	124	123	121	121	119

Earnings-per-share had grown steadily throughout the past decade as Clorox had grown both organically as well as through acquisitions. However, earnings declined sharply in 2022, before rebounding in 2023. In recent years, Clorox has been focused on cost savings and efficiencies that have afforded it more robust earnings growth via margin expansion. Lower revenue makes margin expansion more difficult due to lack of operating leverage. While sales were growing at a rapid rate during the pandemic, that wasn't sustainable, and we feel similarly with margins. With weak sales and margins drifting lower, we are not overly optimistic on Clorox today.

We see Clorox producing 7% earnings-per-share growth annually in the coming years as conditions normalize under the assumption that 2027 is likely to be a trough for earnings. Clorox continues to buy small amounts of growth while focusing on cost savings and reducing the float. Margins finished 2025 very strongly, with pricing increases and cost

savings combining to boost profitability. We note this did not carry into 2026, and we are cautious on 2027. We also note that logistics costs headwinds from the Iran war are an unforeseen headwind to earnings growth.

We expect Clorox to raise its dividend from the current \$5, to somewhere around \$5.80 per share by fiscal 2031.

Valuation Analysis

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2032
Avg. P/E	24.0	22.3	24	23.5	27.7	39.1	27.5	22.1	15.5	17.3	18.4	22.0
Avg. Yld.	2.5%	2.4%	2.5%	2.5%	2.2%	2.9%	3.0%	3.5%	4.1%	4.9%	4.7%	3.2%

Clorox had experienced a sizable increase in its valuation in the years since 2012 as its price-to-earnings multiple nearly doubled. We see fair value at 22 times earnings and shares now trade for 18.4 times this year's earnings estimate given current earnings estimates for 2027. We think the valuation could be a tailwind for shareholders in the coming years as a result. We see the yield potentially declining from the very high 4.7% where it sits today to something around 3.2%, the result of rising earnings and a rising valuation.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2032
Payout	61%	54%	61%	58%	61%	113%	82%	78%	63%	90%	86%	71%

Clorox's payout ratio is 86% today, however, that is because of the guidance given for this year. The company's usually highly stable earnings base generally makes for a safe payout. Even during a recession, shareholders can count on Clorox maintaining (and likely slightly increasing) its dividend payment. We think Clorox can continue to raise its dividend for the foreseeable future, despite its elevated payout ratio.

Clorox's competitive advantages include its broad array of products, as well as the fact that it largely makes staples that people buy irrespective of economic conditions. This affords Clorox strong recession resistance as it actually increased its earnings markedly during and after the Great Recession. Clorox is a pure-play defensive stock in that regard. During a recession, Clorox still delivers as demand for its products is highly stable in tough periods.

Final Thoughts & Recommendation

Overall, we are expecting five-year total returns of 14% annually, comprised of the 4.7% yield, 7% earnings growth and a 3.6% tailwind from the valuation. The stock is undervalued in our view, and it performs well during recessions and sports a strong yield. Given 14% total expected returns, we're reiterating the stock at a hold rating.
