Overview & Current Events

Dream Office REIT is a Toronto-focused office real estate investment trust that owns and manages a portfolio of 23 high-quality office properties totaling 4.4 million square feet of gross leasable area. Most of its properties are concentrated in downtown Toronto, one of the most institutional and supply-constrained office markets in the country. They are mostly mid-sized, well-located office buildings that have been notably upgraded in recent years through renovations, amenity improvements, and sustainability retrofits to meet evolving tenant demands. The REIT is listed on the Toronto Stock Exchange under the ticker D.UN. It also trades Over the Counter as DRETF. The REIT has a market cap of \$255 million.

On August 6th, 2026, Dream Office REIT posted its Q2 results for the period ending June 30th, 2026. Net rental income increased 4.9% year-over-year to \$18.8 million from \$17.9 million, driven by higher straight-line rent and stronger comparative properties NOI, partially offset by lower income from sold properties.

Dream Office completed about 83,000 square feet of leasing during the quarter. In downtown Toronto, leases were signed at an average initial rent of \$24.57 per square foot, 19.6% above prior rents on the same space. Other markets achieved a 10.0% rent increase to \$14.13 per square foot. Overall in-place occupancy improved to 78.8% from 77.3% in Q1, while committed occupancy increased to 83.7% from 83.4%. Toronto downtown in-place occupancy rose more sharply to 83.2%, with committed occupancy reaching 90.0%, reflecting continued positive absorption and new lease commencements.

Diluted FFO per unit increased to \$0.47 from \$0.45 last year. Dream Office also raised its full-year diluted FFO guidance from \$1.66–\$1.70 to \$1.70–\$1.73 per unit, primarily because tenants took possession of committed space earlier than expected. For 2026, we expect FFO per unit of \$1.70.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
FFO/S	\$3.78	\$3.23	\$2.43	\$2.62	\$2.42	\$2.47	\$2.25	\$2.17	\$2.07	\$1.79	\$1.70	\$1.70
DPS	\$2.33	\$1.99	\$1.47	\$1.54	\$1.57	\$1.58	\$1.48	\$1.51	\$0.70	\$0.73	\$0.73	\$0.85
Shares¹	52.4	36.9	29.7	28.1	25.3	24.0	23.1	16.3	16.3	16.4	16.4	15.0

Despite owning some of the best-located office buildings in downtown Toronto, Dream Office's FFO per unit has steadily fallen from \$3.78 in 2016 to \$1.79 in 2025, and the reasons go well beyond FX. While a weaker Canadian dollar (from ~0.75–0.80 earlier in the decade to around 0.70 more recently) has indeed pressured the USD figures, the drop in performance reflects broader operational and structural challenges.

Over the past several years, the REIT downsized and repositioned its portfolio, selling non-core and suburban properties to focus on a smaller group of higher-quality, boutique office assets in Toronto's financial core. While this improved portfolio quality, it also reduced overall rental income, especially as proceeds were used primarily for debt repayment and not FFO-accretive investments.

Moreover, occupancy has also remained under pressure since the pandemic, falling to 76.6% in-place as of the end of

Dream Office REIT (DRETF)

Updated August 22nd, 2026, by Nikolaos Sismanis

last year, compared to over 90% pre-2020. This has limited operating leverage, even though new leases in top buildings have achieved healthy rent spreads. At the same time, leasing costs and tenant incentives have remained high, cutting into profits. This has resulted in a few dividend cuts during the same period. Still, we praise the attractive repurchases below NAV that have consistently taken place.

Moving forward, we expect no growth in FFO per unit, as we believe the current challenges will persist. However, we have embedded a 3% growth rate in our dividend estimate, as future hikes are possible from today's payout levels.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
P/FFO	7.7	10.9	13.4	12.8	13.7	15.6	9.4	6.1	13.1	6.9	7.9	8.0
Avg. Yld.	8.0%	5.7%	4.5%	4.6%	4.7%	4.1%	6.9%	11.3%	2.6%	5.9%	5.4%	6.2%

Dream Office's average price to funds from operations ratio (P/FFO) has deviated significantly around its historic average of 11. At just 7.9 times FFO, we believe the REIT is more or less fairly valued. We understand why the market discounts the stock. We believe the discount fair and we have set our fair multiple at 8 times EPS. The dividend yield now hovers at 5.4%, and should contribute notably to total returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	62%	62%	60%	59%	65%	64%	66%	70%	34%	41%	43%	50%

Dream Office REIT owns a focused portfolio of well-located office properties in downtown Toronto, but the sub-sector's backdrop remains challenging. While the buildings are high quality and have been upgraded over time, leasing demand has been slow to recover, and occupancy remains under pressure. The REIT's tenant base is relatively diverse. However, shorter lease terms and elevated vacancy make cash flow less predictable than in other real estate sectors. Its advantage lies in having control over a curated portfolio in a prime market, with some leasing spreads trending higher. Still, office assets are more cyclical, and the trust has limited near-term catalysts to drive FFO growth. The REIT did show signs of resilience during COVID, but with muted demand and rising interest costs, downside risks remain elevated during a prolonged recession.

Final Thoughts & Recommendation

Dream Office REIT has struggled with declining occupancy and falling per-unit FFO, reflecting ongoing headwinds in the office market. That said, the stock appears undervalued relative to asset quality, and the current yield offers attractive income for investors willing to wait for a recovery. We believe that, mostly the dividend could drive mid-single-digit annualized returns through 2031. Still, we rate it as a sell rating due to lack of dividend growth.
