Overview & Current Events

Gorman-Rupp began manufacturing pumps and pumping systems back in 1933. Since that time, it has grown into an industry leader with annual sales of about \$724 million and a market capitalization of \$2.2 billion. Today, Gorman-Rupp is a focused, niche manufacturer of critical systems that many industrial clients rely upon for their own success. Gorman-Rupp generates about one-third of its total revenue from outside of the U.S. The company also has one of the most impressive dividend increase streaks in the market, which currently stands at 53 years. That makes Gorman-Rupp a member of the prestigious Dividend Kings.

Gorman-Rupp posted second quarter earnings on July 24th, 2026, and results were mixed. Earnings-per-share came to 74 cents, which was four cents ahead of estimates. Revenue was up 4% year-on-year to \$186.1 million, but that missed estimates by \$2.8 million. Sales were higher due to volume growth as well as price increases taken in Q1 of this year. Construction market sales were up \$4.7 million and agricultural sales were up \$4.2 million. The backlog ended the quarter at \$240 million, \$16 million higher than the year-ago period.

Gross profit was \$60.6 million, or 32.6% of revenue. These were higher from \$56.1 million and 31.3%, respectively, a year ago. The gain was driven by improved margin on material, which in turn was driven largely by realized price increases and favorable product mix.

Operating income was \$30.4 million, or 16.3% of revenue. These were higher from \$26.9 million, and 15.0%, respectively, from a year earlier.

We've updated our estimate of earnings-per-share for this year to \$2.80, which would comfortably be a record, if achieved.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$0.95	\$1.22	\$1.53	\$1.37	\$1.11	\$1.32	\$0.94	\$1.37	\$1.75	\$2.14	\$2.80	\$4.93
DPS	\$0.43	\$0.47	\$0.51	\$0.55	\$0.59	\$0.65	\$0.69	\$0.71	\$0.73	\$0.74	\$0.76	\$0.97
Shares¹	26	26	26	26	26	26	26	26	26	26	26	25

Gorman-Rupp's earnings volatility has been very high, and that has translated into a lot of volatility for the stock in the past decade. As the company makes products for industrial and municipal clients, its revenue can swing wildly from one year to another. Margins have been stable over the past decade, but it does experience boom/bust cycles in revenue generation, leading to lots of earnings volatility, as was the case in 2019 and 2020 following a strong performance in 2018. We are forecasting 12% earnings-per-share growth going forward from our earnings estimate that would easily be a new record if achieved. The strength of the company's revenue and margin growth is impossible to ignore as we near the halfway point of 2026.

The company can achieve this result mostly through high single-digit sales growth. Given the company's robust backlog of uncompleted work, we see revenue growth continuing for the near term, which the company says continues to occur.

The Gorman-Rupp Company (GRC)

Updated August 10th, 2026, by Josh Arnold

Gorman-Rupp's primary earnings growth driver is certainly revenue as its margins fluctuate over time, and Gorman-Rupp is focusing on cost containment efforts and that is bearing fruit with profit margins as well.

We are forecasting mid-single-digit growth in the dividend as Gorman-Rupp's increases have been lumpy in the past but have picked up in terms of significance lately.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	28.4	24.7	21.6	24.5	28.8	27.7	27.3	25.9	21.7	22.3	30.0	25.0
Avg. Yld.	1.6%	1.6%	1.5%	1.6%	1.8%	1.8%	2.7%	2.0%	1.9%	1.5%	0.9%	0.8%

Gorman-Rupp's price-to-earnings multiple stayed in a narrow range from 2008 to 2014, but in more recent years, investors have been willing to pay more. Shares trade at 30 times our earnings estimate, which is above our estimate of 25 times earnings. As such we are forecasting a meaningful negative impact on total returns from the valuation in the coming years. The yield could also decline slightly over time, but it's very low anyway.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	45%	39%	33%	40%	53%	49%	73%	52%	42%	35%	27%	20%

Gorman-Rupp's payout ratio is 27% of earnings for this year following the most recent increase in the dividend, but also higher earnings estimates. We see it declining in the years to come as earnings climb.

The company's competitive advantage is in its many decades of experience in providing innovative solutions for niche, but critical, engineering problems facing its customers. However, it is far from immune to recessions as revenue and earnings both fell very sharply during the Great Recession.

Final Thoughts & Recommendation

Gorman-Rupp is trading at 120% of our estimate of fair value following the Q2 report. The company's level of earnings growth could afford investors 8.8% annual returns in conjunction with the 0.9% yield, reduced by a 3.6% potential valuation headwind. We are reiterating the stock at a hold rating after Q2 results.
