Overview & Current Events

Ingredion Inc (INGR) is a multinational ingredient solutions company headquartered in Westchester, Illinois. Founded in 1906, INGR was incorporated as a Delaware corporation in 1997, has over 15,000 customers in more than 120 countries, and employs more than 11,000 people in 22 countries. The company is principally engaged in producing and selling starches and sweeteners for various industries. Essentially, INGR turns grains, fruits, vegetables, and other plant-based materials into value-added ingredient solutions for the food, beverage, animal nutrition, brewing, and industrial markets. Ingredion operates in three business segments: Texture & Healthful Solutions, Food & Industrial Ingredients-LATAM, and Food & Industrial Ingredients - U.S./Canada.

On Aug. 4, INGR released its financial results for the second quarter ended Jun. 30, 2026. The company's net sales edged 0.9% higher year-over-year to $1.85 billion during the quarter. This was powered by a combination of healthy topline growth in the Texture and Healthful Solutions segment to $627 million (+4.7%) in the quarter. Favorable foreign currency translation in the Food & Industrial Ingredients-LATAM segment (+2.5% to $611 million) for the quarter also contributed to INGR's topline growth. This was partially offset by a 6.7% decline in Food & Industrial Ingredients-U.S./Canada segment net sales to $488 million during the quarter, which was due to softer domestic customer demand and production/manufacturing events stemming from a thermal event at the Argo facility. INGR's adjusted EPS decreased by 1.7% over the year-ago period to $2.82 in the quarter. Even with a 300 basis point contraction in the gross profit margin to 23% from higher tapioca costs and operational inefficiencies linked to the thermal event at the Argo facility, that topped the analyst consensus for the quarter by $0.10. A reduced share count and net volume expansion/favorable foreign currency translation helped to partially offset these headwinds during the quarter.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	$7.13	$7.70	$6.92	$6.65	$6.23	$6.67	$7.45	$9.42	$10.65	$11.13	***$10.60***	***$14.52***
DPS	$1.85	$2.10	$2.43	$2.50	$2.53	$2.57	$2.66	$2.91	$3.14	$3.22	***$3.28***	***$4.29***
Shares[2]	72.4	72.0	66.5	66.8	67.0	66.7	65.7	65.2	64.5	63.0	***63.1***	***60.0***

Since 2016, INGR's adjusted EPS has compounded by just over 5% annually. Moving forward, we think that the company's adjusted EPS can grow by 6.5% annually through 2031, off an anticipated 2026 base of $10.60 (the midpoint of INGR's guidance for $10.30 to $10.90 in adjusted EPS for 2026). Net sales growth is likely to remain modest. However, we believe that INGR's structural shift from lower-margin, volatile bulk sweeteners into high-value, high-margin specialty ingredients like clean-label starches, stevia, and plant proteins will contribute to margin expansion over time. Combined with the non-binding proposal to acquire Tate and Lyle recently approved by its shareholders (which would accelerate the specialty pivot if the deal is completed), this is how we arrive at our growth forecast.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	17.5	18.2	13.2	141	12.6	14.5	13.2	11.5	12.8	9.9	***9.8***	***13.0***
Avg. Yld.	1.5%	1.5%	2.7%	2.7%	3.2%	2.7%	2.7%	2.7%	2.3%	2.9%	***3.2%***	***2.3%***

Over the last decade, INGR has been valued at a P/E ratio as low as the high single digits to as much as the upper-teens. The average P/E ratio over that time was nearly 14. In recent years, the P/E ratio has been just above 12. Looking ahead, we continue to believe that a reasonable fair value multiple for INGR is 13. Relative to the current-year P/E ratio of 9.8, this implies shares are significantly discounted.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	26%	27%	35%	38%	41%	39%	36%	31%	29%	29%	***31%***	***30%***

INGR is a leading provider of ingredients to industries that show growth potential, including the food and beverage industry. The company has a simple business model and has firmly positioned itself in the global food supply chain. When a food or beverage giant wants to reformulate a product, they partner with INGR's technical teams to co-develop a precise molecular texture or flavor profile. This integrates the company into the long-term product pipelines of customers, which helps with overall retention. INGR also has cost advantages due to a very high barrier to entry to construct a modern facility like their Argo plant. And because raw agricultural outputs and bulk liquids are heavy and expensive to transport over long distances, its localized plant network and railcar infrastructure create a regional logistics moat.

INGR is also financially healthy. In the first half of 2026, the company's interest coverage ratio was 23x (backing out $47 million of acquisition-related foreign exchange hedging losses). That supports a BBB S&P credit rating with a stable outlook. INGR's dividend is also reasonably safe, which is evidenced by the fact that the adjusted EPS payout ratio is poised to be in the low-30% range in 2026. That positions the company to extend its 15-year dividend growth streak for the foreseeable future.

Final Thoughts & Recommendation

INGR's 3.2% dividend yield, 6.5% annual adjusted EPS growth prospects, and 5.8% annual valuation multiple expansion potential could deliver 14.9% annual total returns through 2031. This is why we're maintaining our Buy rating.
