Overview & Current Events

Founded in 1947, Jacobs Solutions Inc. provides clients with end-to-end services in energy, life sciences, environmental, transportation and water, and advanced manufacturing. The company's team of approximately 47,000 employees tackles many of the world's biggest problems, including water scarcity, aging infrastructure, and access to life-saving therapies.

J operates the following two operating segments:

1. **Infrastructure & Advanced Facilities:** This segment operates in the Critical Infrastructure (42% of FY 2025 revenue), Life Sciences & Advanced Manufacturing (29% of FY 2025 revenue), and Water & Environmental end markets (28% of FY 2025 revenue). The segment offers a variety of services, such as engineering, consulting, planning, and design. In FY 2025, the segment made up 89.8% of J's total FY 2025 revenue.
2. **PA Consulting:** This segment came about from the company's acquisition of a 65% stake in PA Consulting in March 2021 (as of February 2026, this is now a 100% stake). The company's global team of roughly 4,000 people includes strategists, innovators, consultants, designers, scientists, and engineers. These employees work with clients in consumer and manufacturing, defense and security, financial services, energy and utilities, government, transport, and health and life sciences. Clients range from household names like Unilever to start-ups like PulPac, which convert plant fiber into sustainable packaging to substitute for single-use plastic. The segment made up the remaining 10.2% of J's FY 2025 revenue.

On Aug. 4, J released its financial results for the fiscal third quarter ended Jun. 26, 2026. The company's adjusted net revenue climbed 8.3% over the year-ago period to \$2.42 billion in the quarter. Topline growth during the quarter was fueled by a mix of a doubling in the data center backlog over Q3 2025 (and a tripling in the opportunity pipeline for data centers) and the completion of the remaining stake in PA Consulting earlier this year. J's adjusted EPS jumped 13.6% year-over-year to \$1.84 for the quarter. This edged out the analyst consensus in the quarter by \$0.01. That was powered by a 30 basis point expansion in the non-GAAP net profit margin to 9.1% during the quarter and a lower share count, which is how adjusted EPS outpaced adjusted net revenue.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.57	\$2.71	\$3.73	\$4.22	\$4.58	\$5.25	\$5.79	\$6.01	\$5.28	\$6.12	\$7.25	\$12.22
DPS	-	\$0.60	\$0.60	\$0.68	\$0.76	\$0.84	\$0.92	\$1.04	\$1.16	\$1.25	\$1.44	\$2.43
Shares¹	121.0	120.4	142.2	132.9	129.8	128.9	127.4	126.0	124.3	119.1	117.0	105.0

Moving forward, we believe J can deliver 11% annual adjusted EPS growth through FY 2031, off a projected FY 2026 base of \$7.25. Given the record \$28.9 billion backlog (up 27% over Q3 2025), mid-single-digit annual revenue growth is arguably a reasonable expectation in the years to come. The spinoff of lower-margin businesses should also boost margins for the foreseeable future. Along with modest share repurchases, this provides a realistic avenue to our projected EPS growth over the medium term for J.

¹Share count is in millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Avg. P/E	16.8	18.0	17.1	18.0	17.2	21.4	15.7	19.0	24.6	24.8	19.8	21.0
Avg. Yld.	-	1.2%	0.9%	0.9%	1.0%	0.7%	1.0%	0.9%	0.9%	0.9%	1.0%	0.9%

In recent years, J's shares have traded as low as the mid-teens to as high as the mid-20s P/E ratio range. The average P/E ratio over that time has been about 19.3. The spinoff of lower-margin businesses leads us to believe that a re-rating of about one standard deviation higher than the 10-year average could be due. That would represent a P/E ratio of roughly 21 (in line with the five-year average). Relative to the current P/E ratio of 19.8 (following a 24% rally in recent months), J's shares are still slightly undervalued.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	-	22%	16%	16%	17%	16%	16%	17%	22%	20%	20%	20%

J is an established player in its industry, with a wide variety of services that meet the needs of most clients. That has historically led to high retention rates and fairly consistent adjusted EPS growth over the years.

As of Jun. 26, 2026, the company's net debt to trailing 12-month adjusted EBITDA ratio was 1.82x (temporarily higher from the acquisition of the remaining stake in PA Consulting, which will be below 2x by the end of FY 2026 and 1.5x by FY 2027). This lends credence to the argument that J is financially stable. Adding to this is the fact that the company's dividend payout ratio is expected to be in the high-teens to low-20% range for FY 2026. That's a manageable payout ratio that gives J the flexibility to navigate a temporary downturn in profits without likely having to cut the dividend.

Final Thoughts & Recommendation

J's 1.0% dividend yield, 11.0% annual adjusted EPS growth prospects, and 1.2% annual valuation multiple upside potential could generate 13.2% annual total returns through FY' 2031. This is why we're reiterating our Buy rating.
