Overview & Current Events

Bank OZK, previously Bank of the Ozarks, is a regional bank that offers services such as checking, business banking, commercial loans and mortgages to its customers in Arkansas, Florida, North Carolina, Texas, Alabama, South Carolina, New York and California. The \$5.6 billion market cap bank was founded in 1903 and is headquartered in Little Rock, AR.

On July 1st, 2026, Bank OZK announced a \$0.48 quarterly dividend, representing a 2.1% raise over the last quarter's payment and a 9.1% raise year-over-year. This marks the company's 64th consecutive quarter of raising its dividend.

In late July, Bank OZK reported (7/21/26) results for the second quarter of 2026. Total loans dipped -1% but deposits grew 1% over the previous quarter. Net interest income grew 2% thanks to lower deposit costs. However, provisions for credit losses increased 9%. Nevertheless, thanks to higher non-interest income, earnings-per-share grew 3.5%, from \$1.44 to \$1.49, and exceeded the analysts' consensus by \$0.01. Bank OZK has exceeded the analysts' consensus in 21 of the last 25 quarters. The bank has posted record earnings-per-share in 11 of the last 15 quarters. Despite a slight deceleration in the last four quarters, management reiterated that it expects to achieve record net interest income this year. The bank has achieved record earnings-per-share in each of the last five years. Bank OZK is an exemplary bank and hence we are confident in its prospects. Nevertheless, given the recent deceleration in business momentum, we have lowered our forecast for earnings-per-share this year from \$6.20 to \$5.90.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$2.58	\$3.35	\$3.24	\$3.30	\$2.26	\$4.49	\$4.54	\$5.87	\$6.14	\$6.18	\$5.90	\$6.84
DPS	\$0.63	\$0.71	\$0.80	\$0.94	\$1.08	\$1.13	\$1.26	\$1.42	\$1.58	\$1.74	\$1.92	\$2.57
Shares²	121	128	129	129	129	128	118	114	113	112	110	100

Bank OZK had grown its profits per share in almost every year since the financial crisis, which was a strong feat for a bank. In the 2011 through 2019 stretch, earnings-per-share grew by nearly 11% per year. Moreover, Bank OZK has not only been growing organically, but over the last decade the bank has repeatedly made acquisitions which management viewed as suitable. Of course, 2020 proved to be a challenge with earnings down materially.

We believe that Bank OZK will remain on its growth trajectory. Factors like general economic growth, a low payout ratio and coming off a conservative base should help results. If the Fed cuts interest rates over the next five years, it is likely to enhance the net interest margin of the bank. Non-interest income makes up just a small amount of the bank's profits. This makes Bank OZK relatively independent from factors such as market movements, whereas bigger banks - where trading revenues are more important - are more dependent on such factors.

Due to the high earnings-per-share expected this year, we expect 3% earnings-per-share growth over the next five years. This is much lower than the 10.2% average annual growth rate of Bank OZK over the last decade but it is warranted due to the high comparison base.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	15.9	14.4	12.8	9.0	10.8	8.6	9.3	6.8	7.2	7.7	8.6	11.0
Avg. Yld.	1.5%	1.5%	1.9%	3.2%	4.4%	2.9%	3.0%	3.6%	3.6%	3.7%	3.8%	3.4%

The valuation of Bank OZK has moved in a relatively wide range over the last decade. The price-to-earnings ratio of the stock exceeded 20 in 2014-2015 whereas it has plunged below 10 in recent years. Our fair value estimate is 11 times earnings, in line with a typical bank. The stock is currently trading at a price-to-earnings ratio of 8.6, which is much lower than our assumed fair valuation level. If the stock trades at its fair valuation level in five years, it will enjoy a 4.9% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	24%	21%	25%	28%	48%	25%	28%	24%	26%	28%	33%	38%

Bank OZK has raised its dividend at a very strong pace over the last decade, with multiple dividend raises each year. The dividend has been raised every quarter dating back to 2010, as an illustration. The payout ratio is still not elevated though, although 2020 saw a temporary uptick due to depressed earnings.

The bank is well positioned in its key markets, due to the opening of new branches and inorganic growth. Bank OZK is the largest bank in its home state of Arkansas. Given also a long history and strong performance during the last financial crisis, Bank OZK is an attractive financial stock. Bank OZK was very stable during the last financial crisis, as one of just a few banks which managed to grow profits.

Final Thoughts & Recommendation

Bank OZK is much smaller than the well-known banks but it has demonstrated strengths in its niche, partly thanks to its exemplary management. It has proved resilient to recessions and has exhibited above-average growth of earnings-per-share and dividend. The bank easily endured the downturn of regional banks caused by the collapse of Silicon Valley Bank, Credit Suisse and First Republic as well as nearly 23-year high interest rates. The stock can offer an 11.2% total annual return over the next five years thanks to 3.0% earnings-per-share growth, a 3.8% dividend yield and a 4.9% annualized valuation tailwind. It receives a hold rating.
