Overview & Current Events

Raytheon Technologies (RTX) was created on April 3rd, 2020, after the completion of the merger between Raytheon (previous ticker: RTN) and United Technologies (previous ticker: UTX), following United Technologies' spin-offs of its Carrier (CARR) and Otis (OTIS) businesses. The combined businesses, which trade with a \$287 billion market cap and are headquartered in Waltham, MA, is one the largest aerospace and defense companies in the world with ~\$96 billion in annual sales and a global team of ~180,000 employees, including 60,000 engineers and scientists. The company now has three reportable business segments: Collins Aerospace Systems, Pratt & Whitney, and Raytheon, which is composed of the former Raytheon Intelligence & Space and Raytheon Missiles & Defense businesses.

On April 30th, 2026, Raytheon Technologies increased its quarterly dividend 7.4% to \$0.73.

On July 23rd, 2026, Raytheon Technologies released second quarter results for the period ending June 30th, 2026. For the quarter, revenue grew 14.5% to \$24.7 billion, which beat estimates by \$1.82 billion. Adjusted earnings-per-share of \$1.89 compared to \$1.56 in the prior year and was \$0.23 more than expected.

Organic growth was higher by 16% for the period when adjusting for divestitures. For the quarter, organic revenue was up by 17%, 13%, and 18% for the Pratt & Whitney, Collins Aerospace, and Raytheon segments, respectively. Raytheon Technologies' backlog at the end of the quarter was \$289 billion, of which \$170 billion was from commercial aerospace customers and \$119 billion was from defense customers.

Raytheon Technologies provided updated guidance for 2026 as well. The company now expects organic revenue growth of 8% to 9% for the year, up from 5% to 6% previously. Adjusted earnings-per-share are now projected to be in a range of \$7.10 to \$7.25 for the year, up from \$6.70 to \$6.90 and \$6.60 to \$6.80 previously. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2025	2030
EPS	\$6.61	\$6.60	\$7.61	\$8.26	\$2.73	\$4.27	\$4.78	\$5.06	\$5.73	\$6.29	\$7.23	\$10.14
DPS	\$2.62	\$2.72	\$2.84	\$2.94	\$2.16	\$2.01	\$2.16	\$2.36	\$2.48	\$2.67	\$2.92	\$4.10
Shares¹	809	799	861	864	1,515	1,509	1,476	1,362	1,349	1,345	1,351	1,330

Note that we have elected to show United Technologies' history through 2019. However, the company is much different today with the merger and spin-offs. With that being said, both United Technologies and Raytheon have put together solid operating records. In the last decade the company's earnings-per-share fell by an average rate of 0.5%, though this is misleading due to the spinoff. Moving forward, we anticipate solid growth to continue, forecasting 7% growth over the intermediate term. The company has raised its dividend for 32 years.

¹ In millions.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	15.3	17.7	16.8	16.1	22.0	18.4	21.1	16.6	20.2	29.2	29.5	20.0
Avg. Yld.	2.6%	2.3%	2.2%	2.2%	3.6%	2.6%	2.1%	2.8%	2.1%	1.5%	1.4%	2.0%

Shares of Raytheon Technologies have gained \$23, or 12.1%, since our April 21st, 2026 update. The stock has traded with an average price-to-earnings ratio of 19.3 since 2016 and 21 over the last five years. We are reaffirming our target valuation of 20 times earnings, up from 17 previously, to better reflect these average multiples. With shares trading at nearly 30 times estimated earnings, this implies a meaningful valuation headwind. Reverting to our target valuation would reduce annual returns by 7.5% through 2031.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	40%	41%	37%	36%	79%	47%	45%	47%	43%	42%	40%	40%

Both United Technologies and Raytheon showed tremendous resiliency during the last recession, with UTX posting \$4.90, \$4.12, \$4.74, and \$5.49 in earnings-per-share during the 2008 through 2011 timeframe, while Raytheon increased earnings every year during the recession. Moreover, both companies kept increasing their dividends during this period. As of Q2 2026, Raytheon Technologies held \$8.31 billion in cash, \$63.9 billion in current assets, and \$174 billion in total assets against \$63.2 billion in current liabilities and \$105.8 billion in total liabilities. Long-term debt stood at \$32 billion.

Final Thoughts & Recommendation

We continue to remain positive on several fronts about Raytheon Technologies, including the storied histories of the combined companies, the resilient businesses, and the tremendous backlog. The impact of the Pratt engine defect negatively impacted results in 2024, but that segment has rebounded nicely in recent quarters. In fact, all of the company’s segments continue to post strong rates of organic growth. We are forecasting total annual returns of 0.7% through 2031, down from 1.8% previously. Our forecast stems from a 7% growth rate and a 1.4% dividend yield that are offset by a high single-digit headwind from multiple compression. We have raised our five-year price target \$12 to \$203 due to revised EPS estimates for the year. We continue to rate shares of Raytheon Technologies as a hold due to projected results, but note the company’s strong dividend risk score.
