Overview & Current Events

The York Water Company is a special one in the industry since it is the oldest investor-owned water utility in the United States, having functioned continuously since 1816. York Water has a unique record of over 200 years of uninterrupted dividend payments to shareholders. It operates entirely within its franchised water and wastewater territory, which covers portions of 58 municipalities across four counties in south-central Pennsylvania, with an estimated population of 214,000. The York Water Company reported average daily consumption of 23.1 million gallons and generated \$77.5 million in annual operating revenues in 2025. The company is based in York, Pennsylvania.

On August 6th, 2026, The York Water Company reported its Q2 results for the period ending June 30th, 2026. Quarterly operating revenues were \$23.5 million, up 22.5% year-over-year, driven primarily by the rate increase effective March 1st, 2026 and continued customer growth. These benefits were partially offset by the reset to zero of the Distribution System Improvement Charge (DSIC), a Pennsylvania Public Utility Commission-approved charge that allows water utilities to recover qualifying aging infrastructure replacement costs from customers without filing for a rate case. Average water and wastewater customers increased by 876 and 643, respectively.

EPS for the quarter came in at \$0.33, up from \$0.25 in the prior year. Quarterly net income increased to \$4.8 million from \$3.6 million. Earnings benefited from higher revenues and lower income taxes due to increased deductions under IRS tangible property regulations, partially offset by higher operation and maintenance expenses, depreciation, and interest on debt. For FY2026, we expect EPS of \$1.62.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	\$1.01	\$1.04	\$1.11	\$1.27	\$1.30	\$1.30	\$1.40	\$1.66	\$1.42	\$1.39	\$1.62	\$2.07
DPS	\$0.65	\$0.67	\$0.70	\$0.73	\$0.76	\$0.76	\$0.79	\$0.82	\$0.85	\$0.89	\$0.91	\$1.11
Shares¹	12.8	12.9	13.0	13.0	13.0	13.0	14.0	14.3	14.3	14.4	16.2	18.0

York Water is enjoying very stable and predictable cash flows due to water being a vital commodity for households. As a result, the company has seen very steady and gradual growth in its EPS, which features a 10-year CAGR of 3.6%. Future growth catalysts include a growing number of customers and distribution facilities, as well as acquisitions of wastewater systems. For context, during 2025, water customers grew by 1.6% to 73,580 (population served of about 214,000).

Besides organic growth and acquisitions, the company is able to achieve higher revenues over time as a result of increases in water and wastewater rates, which are usually capped at 5% annually and reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. We expect EPS growth of around 5% in the medium-term, in line with the company's historical average. Due to such a predictable business model and financials, the company has been able to deliver one of the most impressive dividend records in the world, numbering 210 years of uninterrupted dividend payments. We expect DPS growth of

¹ Share count is in millions.

around 4% in the medium-term, in line with its latest increase and the current trend of an improving payout ratio. Dividends have grown annually for 29 consecutive years.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	32.2	34.7	29.8	41.5	35.4	36.1	31.2	24.8	26.3	23.8	21.0	18.0
Avg. Yld.	2.1%	1.9%	2.2%	1.5%	1.6%	1.5%	1.8%	2.0%	2.3%	2.7%	2.7%	3.0%

The York Water's valuation multiple was hovering at a steep premium between 2016 and 2022, as was the case with its industry peers. We believe that the stock should be priced notably lower, but recognize the high likelihood of investors continuing to price shares at current levels due to their unique and sought-after qualities. Still, the valuation appears to be rich today considering the rather limited growth prospects. For this reason, we forecast a valuation headwind ahead.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	64%	64%	63%	57%	58%	58%	56%	49%	60%	64%	56%	54%

As mentioned, the York Water Company's revenues should remain ultimately resilient in the future, powered by a very predictable business model and slow but gradual growth catalysts. The company's cash flows are unlikely to be affected by any potential recession, as was the case during the Great Financial Crisis and the COVID-19 pandemic. York should soon declare its 623rd consecutive dividend, which is a testament to its ability to produce solid financials under any potential economic scenario. Finally, the company operates within an exclusive franchised territory that is substantially free from direct competition with other public utilities, municipalities, and other entities, adding another layer of safety to its business model. We believe York's dividend is extremely safe and certainly trustworthy.

Final Thoughts & Recommendation

The York Water company displays one of the longest and most impressive shareholder value creation stories in history. Few companies can boast such an extended record of success and dividend payments. Its mature operations should deliver relatively modest growth metrics. Along with the starting yield, we forecast annualized returns of 4.5% through 2031. Very conservative income investors may appreciate its robust qualities despite the lack of more exciting total return prospects. Shares earn a hold rating.
