Overview & Current Events

FinVolution Group (FINV) is a fintech company which operates primarily in China but also internationally. Through its finance technology platforms, it automates loan transaction processes. It was previously known as PPDAL Group Inc. and became FinVolution in November 2019. The company was founded in 2007, and is headquartered in Shanghai, China. Investors can initiate an ownership position in the company through American Depositary Receipts (ADRs) that trade with a market capitalization of \$833 million under the ticker FINV. Each of these ADRs represent five Class A ordinary shares of FinVolution Group.

On March 16th, 2026, FinVolution declared a 10.5% increase to its dividend, now \$0.306 per share, marking its sixth consecutive yearly increase. The dividend is paid annually, in the month of May.

FinVolution reported second quarter 2026 results on August 27th, 2026. Total outstanding loan balance fell by 12.4% year-over-year to RMB67.9billion. Total transaction volume in the quarter decreased by 17%. Diluted profit per ADS was US\$0.26, and adjusted profit per ADS was US\$0.29. Its adjusted operating margin declined from 23.9% a year ago to 16.8% in the latest quarter.

Provision for loans receivable was RMB164.4 million (US\$24.2 million) in Q2 2026, up from RMB98.4 million in Q2 2025.

In the second quarter of 2026, FinVolution bought back US\$27.4 million of its shares.

For 2026, management still expects total revenue of RMB11.5 billion to RMB12.9 billion, which would be a 5% to 15% decrease from last year.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
EPS	(\$0.07)	(\$1.96)	\$1.12	\$1.10	\$1.01	\$1.33	\$1.13	\$1.18	\$1.24	\$1.37	\$1.05	\$1.77
DPS	\$0.00	\$0.00	\$0.00	\$0.19	\$0.12	\$0.17	\$0.21	\$0.22	\$0.22	\$0.28	\$0.31	\$0.47
Shares²	133.0	156.0	319.9	310.5	298.3	296.5	290.9	280.6	264.0	266.8	260.0	255.0

In the last five years, FinVolution has increased its EPS at a 6.3% CAGR. Its loan book has also grown at a strong pace with outstanding loans growing by 9% CAGR since 2021. Moving forward, FinVolution is likely to generate higher growth, as it executes its Local Excellence, Global Outlook+ (LEGO+) Strategy, where it enters into developed markets.

Expanding into developed countries through acquisitions, such as it did with Australia (by purchasing Fundo) recently, will fuel growth and diversification. In fact, FinVolution has been relying on revenue from international markets to bolster growth, and international markets as a percent of revenue has grown from 9% in 2021 to 25% in 2025.

Furthermore, the company expects international revenue to account for 30% of revenue in 2026 and is targeting 50% for 2030.

In 2025, FinVolution repurchased US\$107 million of its shares. And since its NYSE IPO in 2018, FINV has repurchased US\$544 million of its shares, reducing its share count by over 17% in that timeframe.

FinVolution Group (FINV)

Updated September 8th, 2026 by Quinn Mohammed

From this point on, we expect that FinVolution will generate 11% annual EPS growth through 2031.

The company’s dividend has increased at a much higher rate than its EPS, with a 5-year CAGR of 18.2%. Given the increase in its payout ratio since it has begun raising its dividend (now consuming 29% of EPS), we believe a lower rate of 9% dividend growth going forth is reasonable.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/E	-	-	5.5	3.5	1.9	4.8	3.9	4.1	4.4	5.7	3.2	4.6
Avg. Yld.	0.0%	0.0%	0.0%	4.0%	7.3%	2.6%	4.5%	4.5%	4.3%	3.5%	9.1%	5.8%

FinVolution’s average PE ratios over the last eight and five years have been 4.2 and 4.6, respectively. Its current PE ratio of 3.2 is below where we see fair value, at 4.6 times earnings. If the company’s valuation were to rise to our estimate of fair value, the stock would benefit from a 7.4% annualized gain on its total return.

The company has paid an average dividend yield of 3.1% and 3.9% over the last eight and five years. Given the stock now yields 9.1%, it could be considered undervalued on this basis.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	0%	0%	0%	17%	12%	13%	18%	18%	18%	20%	29%	27%

Although FinVolution continued to perform and stayed profitable through the pandemic, its stock suffered a significant decline. In 2020, the company reduced its dividend payments by 37% due to the global crisis.

FinVolution is vulnerable during economic downturns, as consumers experiencing financial difficulties tend to cut back on spending, which leads to fewer and smaller loans. A major downside risk to FinVolution group is its reliance on China, which accounted for 75% of its 2025 net revenue. Any prolonged downturn, or significant regulatory change, in China, will have an outsized effect on the company’s performance.

FinVolution’s competitive advantage is its proprietary platform, which utilizes AI for risk management, analytics, and automation, in the loan transaction process. It also benefits from its strong reputation and relationships with more than 100 financial institutions.

Final Thoughts & Recommendation

FinVolution’s stock has declined by 35% year-to-date, which compares unfavorably to the S&P 500, which rose 13%. FinVolution Group could offer a 24.6% average annual return over the next five years, stemming from 11% annual EPS growth, its 9.1% dividend, and 7.4% multiple expansion. FinVolution maintains its buy rating.
