Overview & Current Events

In 1897, Jerome Monroe Smucker founded a small cider mill in Orrville, Ohio. He used surplus apples, said to be cultivated by Johnny Appleseed, to make cider and apple butter. Since then, the J.M. Smucker company has grown into an international powerhouse of packaged food and beverage products including iconic names like Smucker's, Jif and Folgers, along with various pet food brands. The company has a market capitalization of \$14.1 billion and generated \$9.1 billion in sales in fiscal 2026.

On November 7th, 2023, Smucker's completed the acquisition of Hostess Brands (TWNK) in a cash-and-stock deal with a value of \$5.6 billion, which included debt. Hostess Brands has many sweet baked goods brands, which have expanded the product portfolio of Smucker's and create synergies. However, the deal value is about 13.2 times EBITDA of Hostess Brands, after the expected synergies have been taken into account. We thus view the deal as expensive for Smucker's.

In late August, Smucker's reported (8/26/26) results for the first quarter of fiscal 2027, which ends on April 30th, 2027. Currency-neutral, organic sales grew 5% over the prior year's quarter, primarily thanks to strong price hikes in coffee. Adjusted earnings-per-share grew 71%, from \$1.90 to \$3.24, and exceeded the analysts' estimates by a massive \$1.02 thanks to lower costs, tariff refunds and cost derivative gains. Smucker's has missed the analysts' consensus only once in the last 28 quarters. Thanks to strong business momentum, Smucker's improved its guidance for a decrease in sales from 3.0%-4.0% to 1.0%-2.0% and its guidance for adjusted earnings-per-share from \$9.75-\$10.25 to \$10.50-\$11.00. This guidance is uniquely adjusted as it adds back in amortization (about \$1.50 per share). We include the impact of amortization expense in our earnings expectations and raise our forecast for earnings-per-share from \$8.50 to \$9.25.

Growth on a Per-Share Basis

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2032
EPS	\$6.49	\$6.97	\$6.66	\$6.84	\$7.79	\$7.34	\$7.38	\$8.40	\$8.62	\$7.65	\$9.25	\$10.72
DPS	\$3.00	\$3.12	\$3.40	\$3.52	\$3.58	\$3.87	\$4.08	\$4.24	\$4.32	\$4.40	\$4.48	\$5.08
Shares²	113	114	114	114	112	108	105	106	106	107	107	100

Smucker's has grown its earnings-per-share by 1.8% per year on average over the last decade. Previously the company provided long-term guidance for 8% annual earnings-per-share growth. While we believe this is a great goal, we are hesitant to extrapolate that sort of growth over the intermediate term. The company has a collection of iconic brands, but many of them are center-aisle staples that have been losing popularity as consumers look for fresher, healthier options. Increased advertising spending and moving toward consumer preferences will require significant capital outlays in the years to come. On the positive side, coffee is a strong, sticky segment for the business and Smucker's is working to expand the current iconic lines, such as Jif, to more on-trend products like granola bars and on-the-go snacks.

The pandemic spurred demand in recent years, but we do not see this as a long-term tailwind. If the company meets the mid-point of its guidance in the new fiscal year, it will have grown its earnings-per-share by 3.0% per year on average over the last five years. We forecast 3% average annual growth of earnings-per-share over the next five years.

Valuation Analysis

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	Now	2032
Avg. P/E	21.0	17.0	16.2	16.3	14.8	17.9	19.5	15.6	13.2	13.7	14.2	16.0
Avg. Yld.	2.2%	2.6%	3.2%	3.2%	3.1%	2.4%	2.8%	3.2%	3.8%	4.2%	3.4%	3.0%

The stock of Smucker's has traded at an average P/E ratio of 16.5 over the last decade. While this mark is not extreme, we do caution that it could be overstated should earnings growth stall. We have thus assumed a fair P/E ratio of 16.0 for the stock, in line with its 5-year average P/E ratio. Smucker's is currently trading at a P/E ratio of 14.2. If it trades at our assumed fair valuation level in five years, it will enjoy a 2.5% annualized valuation tailwind in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2032
Payout	46%	45%	51%	51%	46%	53%	55%	50%	50%	58%	48%	47%

Smucker's iconic brands continue to enjoy recognition, but this moat is eroding somewhat as consumers look for fresher and healthier alternatives. During the last recession, Smucker's held up exceptionally well, growing both earnings and dividends during this time. Our apprehension is not with the next recession, but instead whether or not the company can meaningfully grow. As the pandemic has subsided, growth prospects appear lackluster.

The company has been working towards growth, mostly via acquisitions. Of course, this has levered up the balance sheet, but leverage remains under control. Smucker's has net debt of \$9.8 billion, which is 70% of the market capitalization of the stock. The company also has an interest coverage ratio of 4.7, which is healthy. In addition, the 3.4% dividend is fairly safe, given the decent payout ratio of 48% and the resilience of the company to recessions.

Final Thoughts & Recommendation

Smucker's has surged 34% this year thanks to a great improvement in business performance. Smucker's could offer an 8.4% average annual return over the next five years thanks to 3.0% growth, a 3.4% dividend and a 2.5% valuation gain. While Smucker's has a strong history with a solid dividend and iconic brands, its industry appears to be facing long-term headwinds, mostly due to increased health-consciousness of consumers. The stock receives a hold rating.
